Precautions
1. Please consult your physician to verify
your body temperature.
2. DO NOT scrape or scratch the lens as it will
hamper the effectiveness of the device.
3. The device is intended for consumer use
only.
4. Do not drop or expose thermometer to
electric shock as this may adversely
affect its performance.

Parts Identification

Information You Should Know Before
Operating the IR Ear Thermometer

How to correctly use the IR ear
thermometer

1. It is useful to try this thermometer on
yourself first to become familiar with it’s
operations.
2. Do not take the temperature immediately
upon waking. Sleeping on the ear can
cause the temperature to be higher than
normal.
3. It is common for the readings to be slightly
different between the right and left ear.
We suggest using the same ear to obtain
temperature readings.
4. Straighten the ear canal for measuring:
Children under 12 months:
Straighten ear canal by gently pulling the
ear back.

Children over 12 months and Adults:
Straighten the ear canal by gently pulling the
ear back and up.

5. Make sure the ear canal is dry, clean and
free of wax or particulates.

Why an IR ear thermometer?
The tympanic membrane (eardrum), and the
hypothalimus, the part of the brain which
controls body temperature, share a common
blood supply so tympanic readings rise and
fall rapidly with core temperature (deep
body temperature). This makes the ear
temperatures one of the best indicators of
internal body (core) temperature.

What are normal temperature values?
Human body temperature varies from person
to person, some run in the lower range (96-97°F) and some run in the higher range
(98.5-99°F). Also, your normal body
temperature changes throughout the day
and can vary at different times of the year. It
is very important to know your normal body
temperature range. We recommend
measuring yourself when healthy to establish
reference temperatures. This will help you
feel more confident of the measured
temperature readings when ill.

What is the battery life?
The IR Ear Thermometer uses two AAA
batteries which are rated to provide power
for about 3000 readings. When the battery
indicator is low, replace the batteries with
two new AAA batteries.

Power Source
SIZE AAA (1.5V) x 2

Warranty:
One year from the date
of Purchase

Preparation for Use

Installing/Replacing the Battery:
1. Slide the battery cover off in the direction shown below.
2. If replacing, carefully remove batteries.
3. Clean the battery end as well as the contacts in the device prior to reinstalling batteries.
4. Install two new AAA batteries into the battery compartment making sure to match the correct polarities (+ and -).
5. Replace and securely fasten the battery cover as shown below.

NOTE: Each time you turn on the unit, it will automatically run a diagnostic check and the screen will show colors and all symbols.

How to Operate the Thermometer

QUICK START
1. Press and release the POWER button. You will hear a short beep and the memory will show the last temperature taken.
2. Place the Probe inside the ear canal or aim toward the object approximately 3/4 - 1 1/4 inches (1 - 3 cm) from surface.
3. Press and release the POWER button to record new measurement.
4. Two short beeps let you know the measurement is complete/ready to read.
5. The temperature and back light color shows on the display. The back light color will light according to the reading:

<table>
<thead>
<tr>
<th>Reading in °F</th>
<th>Reading in °C</th>
<th>Back Light Color</th>
</tr>
</thead>
<tbody>
<tr>
<td>up to 98.9</td>
<td>up to 37.1</td>
<td>GREEN</td>
</tr>
<tr>
<td>99.0 - 99.4</td>
<td>37.2 - 37.4</td>
<td>YELLOW</td>
</tr>
<tr>
<td>99.5 and up</td>
<td>37.5 and up</td>
<td>RED</td>
</tr>
</tbody>
</table>

6. Turn the unit off by pressing and holding the POWER button for about 5 seconds until the display shows OFF and a long beep is heard.

7. The device will automatically shut off after about 1 minute of non-use.

WARNING:
Batteries Contain Mercury. DO NOT PUT IN REGULAR TRASH, dispose of in recycling trash only. Recycle or manage as hazardous waste. Never dispose of batteries in fire. Do not recharge (unless rechargeable), put in backwards or disassemble. This may cause explosion, leakage and injury.

CAUTION:
When replacing batteries, do not mix old ones and new ones. Never mix alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium) batteries.

CHANGING MODES
This device has two modes: Ear Object

- Ear mode is for measuring temperature of the tympanic membrane (eardrum) to determine body temperature.
- Object mode is for measuring temperature of an object or surface. This mode is not intended for measuring human body temperature.

*Device will always power on in Ear Mode*
1. Press and release the POWER button to turn on the device.
2. Immediately press and hold the Memory/Mode button until you see either Ear or obj, then release button.
3. You may toggle between modes simply by following step 2.

RECALL MEMORIES
This device will hold 10 temperature readings in memory (Ear and Object readings combined).

- Ear memories will show the small ear icon in the top right side of display.
- Object memories show nothing in that area.

1. The device must be powered OFF in order to recall memories.
2. Simply press and release the Memory/Mode button to show stored temperature readings.
3. The most recent temperature reading will be the first to show.
4. When viewing memory, the device will automatically shut off after 3 seconds of non-use.

DELETE MEMORIES
1. Repeat steps 1 and 2 in "Recall Memories".
2. Press and hold the Power button until "dEl" is displayed.
3. Release button. All stored memories are now deleted. Device will automatically shut off.

IMPORTANT THINGS TO KNOW
- Allow at least 1-3 minutes between each measurement in order to obtain the most accurate result.
- The default mode is Ear mode. Any time the unit is powered off, it will power on in ear mode.
- Make sure the probe lens is clean and clear before use. It should be ‘mirror like’ or reflective. A dirty, blocked or scratched lens will cause incorrect results.
- Do not store the device in extreme conditions or temperatures (i.e., direct sunlight, very hot/cold or high moisture like a bathroom). Unit is not waterproof.
- If it has been stored in extreme conditions, wait at least one hour for it to return to a normal room temperature before using.
- Wait at least thirty minutes after bathing, exercising or eating before taking a measurement.
- Do not dismantle or modify the device other than changing the batteries.
- This device has no user serviceable parts. Do not dismantle or modify other than changing the batteries.
CLEANING AND CARE

- Use a cotton swab with rubbing alcohol to gently clean the surface of the lens. Wait at least 40 minutes before taking the next measurement as the alcohol may affect the reading.
- Avoid using thinner, benzene or any other harsh cleaners.
- Remember to remove the batteries if the unit will not be used for an extended amount of time.

ERROR MESSAGES

- **H** - The temperature reading was above the specified measuring range. Wait a few minutes and measure again.
- **L** - The temperature reading was below the specified measuring range. Wait a few minutes and measure again.
- **Erl** - The ambient (room) temperature is out of the specified environment operating range. Keep in an ambient temperature of 60.8 – 104°F for at least 30 minutes before using.
- **Err** - The device self-diagnostic failed. Reinstall batteries and try again. If that does not work, contact the distributor.

SPECIFICATIONS

- **Measurement Site**: Ear canal and Object
- **Measurement Time**: 1 second
- **Measuring range**: Ear Mode: 90.0°F to 109.9°F (32.2 to 43.3°C) Mode: 32.0°F to 139.9°F (0.0°C to 59.9°C)
- **Accuracy**: ± 0.8°F (±0.2°C), ±Less than 0.8°F (±0.2°C)  or ±Greater than 0.8°F (±0.2°C) ±0.5°F (±0.3°C)
- **Resolution**: ±0.1°F (±0.1°C)
- **Memory Sets**: 10 sets
- **Operating Environment**: 60.8°F to 104°F (16°C to 40°C) 15% to 95% RH (non-condensing)
- **Storage Environment**: 4°F to 122°F (-20 to 50°C)
- **Battery**: AAA x 2
- **Battery Life**: Approx. 1000 measurement cycles
- **Auto Shut Off**: After 1 minute of non-use
- **Dimensions**: 137mm x 33mm x 42mm
- **Weight**: 48g including batteries
- **Warranty**: 1 year
- **Guarantee of Quality**: Certification ISO 13485, Conformity EN 12470-5 & IEC 60601-1

LIMITED WARRANTY

- This device (batteries excluded) is guaranteed for one year from the date of purchase against manufacturer’s defect under normal use and without evidence of tampering.

WARRANTY EXCLUSIONS:

- Device is not properly operated according to the instructions as described in this manual.
- Device shows any signs of tampering or attempted modification.
- Evidence of improper handling or storing, such as dropping, heat, liquid or cleaner damage.
- Natural disasters (such as fire, flood, earthquake, lightning).
- **No receipt or proof of purchase showing date of purchase**

Following the instructions closely will ensure years of dependable operation.

If the device does not function properly, please contact 180 INNOVATIONS at info@180innovations.com or call 1-877-299-6700. Our representative will provide further instruction on how to correct the trouble or will ask you to return it along with proof of purchase for repair or replacement.

FCC STATEMENT

- **POTENTIAL FOR RADIOS/TELEVISION INTERFERENCE [For USA Only]**
  - Operation is subject to the following two conditions: 1) This device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.
  - This product has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. The product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the product does cause harmful interference to radio or television reception, which can be determined by turning the product on and off, the user is encouraged to try to correct the interference by one or more of the following measures:
    - Reorient or relocate the receiving antenna.
    - Increase the separation between the product and the receiver.
    - Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by 180 INNOVATIONS may void the user’s authority to operate this device.
