

## CENTRAL FLORIDA COLLEGE ACCESS NETWORK

Prepared by the Florida College Access Network

**JUNE 2017** 

#### Dear Friends and Colleagues,

To build a prosperous future for all Floridians, education beyond high school is key—in fact, labor economists project that 65% of Florida jobs will require a postsecondary degree or credential within just a few years. That's why Florida College Access Network (Florida CAN) adopted Goal 2025 – to increase the percentage of working-age Floridians with a high-quality postsecondary degree or credential to 60% by 2025.

Florida has made some good progress toward Goal 2025 in recent years, but we need to accelerate our efforts to ensure Floridians have the education and skills necessary to meet future talent needs. Currently, about 40% of Floridians hold a two-year degree or higher, and an estimated 7% have a certificate or vocational credential. At our current rate of growth we will only reach 53% by 2025 – far short of projected workforce demands.

To support your region's efforts to boost postsecondary attainment and provide you a snapshot of your education and workforce landscape, Florida CAN offers you this 2017 Goal 2025 Report. It includes:

- High school student participation rates in International Baccalaureate, Advanced Placement, and dual enrollment coursework all indicators of college readiness;
- On-time high school graduation rates;
- Completion of the Free Application for Federal Student Aid (FAFSA) by high school seniors an important indicator of future college enrollment;
- College enrollment rates;
- Early college success, or the rate at which students complete at least one year of college credit within two years of enrollment an indicator of future degree completion.

Additionally, for the first time and by popular demand, the 2017 Goal 2025 Report also includes:

- · Projected regional industry changes and occupation demand
- Veteran population profile
- Industry certifications earned in public schools
- Financial aid, debt, and loan repayment characteristics of students attending local postsecondary institutions
- · Highlights of first-generation and non-completer student outcomes at postsecondary institutions

We hope this report provides you with a broad view of your region's education and workforce landscape. We encourage you to use it as a tool to increase awareness, inform conversations around local needs, develop a common agenda with shared community goals, and spark more in-depth data gathering and sharing between local partners. We hope it helps inform community efforts to build your talent pool, supports efforts to develop shared metrics for community success, and shines a light on opportunity gaps with the goal to identify the best practices with potential to improve outcomes for all students, regardless of zip code or circumstance.

Questions about the report? Looking for data you don't see here? Need help with how to use this tool for stakeholder conversations or other uses? Email our research and data team at

tmiller@floridacollegeaccess.org and klent@floridacollegeaccess.org to set up a call. We are here to help!

Thank you for your commitment to Goal 2025, and everything you do for Florida students!

Sincerely,

Laurie Meggesin Executive Director

Florida College Access Network

#### Local College Access Networks

Local College Access Networks (LCANs) are place-based strategic alliances of leaders and organizations representing K-12, higher education, nonprofits, philanthropy, local government, and business that work collectively to develop a postsecondary attainment goal for their regions and develop a common agenda to achieve their goal. Florida College Access Network is pleased to support the development and growth of LCANs across the state.

Source: Florida Department of Education. Enrollment counts include students attending National Student Clearinghouse member institutions within 16 months of graduating high school. One year of college credit equals 30 credits. For a full list of participating enrollment reporting institutions, visit http://www.studentclearinghouse.org/high\_schools/studenttracker/participating\_colleges.php. Methodology of data collection results in approximately 5% of missing data for college attendees. Data for schools with the largest 2011 cohort size were included in this report, more school data exists and can be provided upon request.

Source: U.S. Department of Education, Integrated Postsecondary Education Data System (IPEDS). Notes: Chart includes institutions with over 500 undergraduates. Retention rates measure the percentage of first-time students who are degree-seeking who return to the institution the following fall. Overall grad rate represents percentage of full-time, first-time students who graduated within 150% of normal time to completion for their program of study. The cohort representing each institution represents most recent year of data available from IPEDS. Data for postsecondary institutions in surrounding areas can be provided upon request.
