

Great Horned Owl

Bubo virginianus

Great Horned owls are a year-round resident species in Virginia. They are found throughout North America. This owl lives in a variety of environments from deep forests, desert cliffs, and woodlots to suburban estates and parks. A Great Horned owl eats a varied diet, but with a preference for rabbits, rats and mice. At night you may hear it call by letting out a series of deep hoots.

If you see a raptor that appears to be injured, orphaned or ill, please call RCV at **703-578-1175**.
