

Easy Feeling

Verse 1

I always seem to find myself where I used to be, no direction as I walk relentlessly
My feet are tired and my soles are wearing thin, confliction is a curse of life that comes
from deep within, and that's alright, yeah that's alright

Verse 2

Got a noisy shoulder with quite a pretty face, pulling on my coat tails and slowing down
my pace

Haloing horizon means a town is growing near, where the voices are so loud that mine
are all I care hear, and I don't fight, no i don't fight

Chorus 1

I made this bed to sleep in, sometimes it breaks my heart
Welcome an easy feeling, and make a better place to start

Verse 3

Cobwebs in my makers, are sticking to the walls, I scrub them till my fingers bleed but
still the curtain falls

Running from a shadow while connected at the knee, questioning the features for so
long I fail to see they come from light, they come from light

Chorus 2

I made this bed to sleep in, sometimes it breaks my heart
Welcome an easy feeling, and make a better place to start

Verse 4

Got a lot of cargo to deliver up the hill, quite a heavy load to bear the burden no one will
Message for the people, who sleep beneath the tree, waiting for the fruit to fall will never
help to see the ends in sight, the ends in sight

Chorus 1

Chorus 2

New Day

Verse 1

It's just the way of the world they say
The sun goes down and the afternoon it fades away
The wind blows cold from the hills to the valley below
And everybody stands around just to watch the show.. and they say

Chorus 1

That's just the way it is, it's always gonna be this way

Doesn't matter how hard you try, the nights coming for you any way
Bringing on a new day, but it's the same old story
When I wake up tomorrow maybe this won't look the same

Verse 2

If you can see me running, don't try and stop me
The fog ain't lifting and we got somewhere to be
If you can see me drifting, it leaves me begging
For a breeze to come and clear the skies so we can finally see.. so you know you better

Chorus 2

Hold on tight because the hurricane is coming
Category 5 will wipe away
Bringing on a new day, but its the same old story
When I wake up tomorrow maybe this won't **feel** the same

Verse 3

If you can see me swimming, with no sign of stopping
Going with the flow I ain't got no time to waste
If you can see me flying, above the ground I'm floating
When I turn around the cold wind is blowing on my face.. so you better

Chorus 3

Hold on tight because the hurricane is coming
The night sweeps in just to wash the day away
Bringing on a new day, but its the same old story
When I wake up tomorrow maybe this won't **look** the same

Verse 4

If you can see me standing here so proudly
Digging my roots deep into the ground
You can hear it roaring, the earth is quaking
The storm is always further when you're listening for the sound.. so you better

Chorus 4

Hold on tight because the hurricane is coming
Category 5 will wipe away
Bringing on a new day, but its the same old story
When I wake up tomorrow maybe this won't **be** the same

Thank You For Me

Verse 1

Its hard to walk the line, with slopes slipping on opposing sides, as the ridge top keeps winding down

At stake to lose or gain, do your best just to maintain, willing to swear your life so not to stray

A blinded eye is a focused eye and can read between the lines of words engraved

Verse 2

At first you don't expect, a spitting image to reflect on the waves in which your life accompanies

Embrace your soul to find your surrounded by a loving kind, break down all the walls that once confined

Makes the sour sweet and ragged beautiful, my oh my

Chorus 1

It's been so much longer than I remember, sometimes I still await your call
Never had a chance to show you how it came to be, so I thank, I thank you,
thank you for me

Verse 3

A waking mind will gaze, blank slate when questions raise, its a momentary overlapping phase

You'll find the answers lie, imbedded in the deepest signs, the circus can distract an active mind

Brightest lights will dim to cue the melody, when you arrive

Chorus 1

It's been so much longer than I remember, sometimes I still await your call
Never had a chance to show you how it came to be, so I thank, I thank you,
thank you for me

Chorus 2

Reaching out to touch you but the distance stays the same, I'll be damned if I let a little speed bump stop this train

Never had a chance to show you how it came to be, so I thank, I thank you,
thank you for me

Never had a chance to show you how it came to be, so I thank, I thank you,
thank you for me

Land Mines

Verse 1

I started to remember at 3 years old, me, my brother's axe and toad,

Open halves hit a chilly brain, stained it like a window pane

We ran to the kitchen but we didn't know why, it was the first time we had crossed the line, the first time we had tempted fate, first edition of mistakes

Growing older's been the same old tale, like the barrel of a gun that never fails, recoil makes you lose your feet, blast you back into the deep

To those who point the finger, I say, "a mirror would suit well," if living life is sinning I will pack my bags for hell!

Chorus

Been running from the truth, but it's never behind ya
Gunning it to 88 and still it's bound to find ya
The green eyes of envy entertain a losing game
Take my advise, those dice will never change

We all have the power, to alleviate the hate
Together we can hang it on the line to propagate
So if seeing is believing, then take a look around
The mines we scatter across the land are breaking through the ground

Verse 2

Ever since there's been a pulse in my vein, I rang the bell and hit sustain, My momma sat me down and she said to me "speak it as it needs to be"
It was the best advice I had got in my life, to clean the slate and ease the strife, please the eager and plant the seed, grow it for the world to see
Now that tree stands tall in the desert, but in the forest its profound
Bones upon the surface soil supporting life aground
The brightest flames won't hesitate to burn it down half as long
The brightest flames will resonate the longest when they're gone

Chorus

Forward Motion

Chorus

Forward motion, forward motion in me
Forward motion, forward's all I see
Forward Motion, forward motion in me
(I can't) Let my emotions get the best of me

Verse 1

We're all human moving at a speed, naturally
I kick push forward rapidly, map and lead
Right foot, left foot, check your direction
Forward motion, step with conviction

We're all human moving at a speed, plant a seed
Press to do better, and succeed, never treasure fantasies
Future schooling, tutors learning, lesson progression of a person
Planet spinning, not the beginning, off this rock we'll be ascending

Let go of feelings that keep holding you from moving forward
Stepping backward we don't need that positive feedback keep propelling
Ain't no telling where you'll end up if you keep on moving
Water gotta flow like fabric, can't live off a lake if it's stagnant

Bacteria growth is gross, you can't drink it, giardia, put you in the sink, sick
Recovery of your anatomy, bodily fluids, astronomy movements
The earth orbits the sun, and the sun hula hoops the earth
In a spiral galaxy spun we move and loop throughout the universe

Chorus

Verse 2

Even when I close my eyes its forward that I see
The trees are blurring into lines that blind peripherally
The rock on which we move and breath is anything but free
Slave to the sun and galaxy

Well it's pullin' and-a pullin' and-a pullin' you back and the paths been bogging you down
Given time your feet will find a firmer piece of ground
Pushing and-a pushin' and-a pushin' your luck till you don't know where to be
Straight ahead, one step two times, find it naturally

Chorus

Verse 3

My mind is spinning round like a top, I gotta keep on moving no I just can't stop
Its like everyday trying to push on through, no time like the present gotta pay my dues
Said the futures' right now In the palm of my hand, no brakes just gas is the master plan
I stay so fresh like Im irish spring, I got this beat in my heart and a song to sing

I keep pushing and-a pushing no holding it back, move forward till I'm done is my plan
of attack
I got no time just to sit an relax, all my people can you feel me from the front to the back
Keep pushing and-a pushing and-a pushing it good, music pumping so hard like I wish
you would
I ain't never gonna stop till its understood, UJ's in the house motherfucker whats good,
sing

Chorus

Chorus (with claps)

Chorus

Restless and Willing

Verse 1

Here we go again its 2 a.m. and our minds are racing, haven't got a clue,
what to do, or what time we're leaving
Hurry up and wait the likes of us can soon relate, got a bone to pick but the
lights have made the pickin' slim
We're off-sailing away on a ship of foolish paper bags, no need to dress her up in amber
linens
How high can the mountain climb before it up and tares the sky, guess we'll never know
unless we try

Chorus

So pass the bottle, call your friends, we're gonna paint this town red
again, last ones awake when the sun comes spilling
The more the better, in the end, plenty of time for sleeping when her
warm and open arms have started chilling... *Restless and Willing*

Verse 2

We're on our way, loose ends we've tied have begun to fray, half a mile from
everywhere but we never get there
Careening towards uncertainty we bank right in the nick of time by the skin of our teeth,
the monkey on our back tends to agree
We reach the place in seven score, where the only chairs are a padded floor, we fit right
in before we crossed the door
So let's hit the point of no prevail, the point where our inhibitions fail, and me, I've got a
thrust that could drown a whale!

Chorus / Instrumental / Chorus

Take a Minute

Verse 1

Some people paint their pictures, while living on the page
Makes life better when things are wetter, there's never signs of age
In a world that's changing, you know the colors can bleed together
Find your key for clarity, and keep it close forever

Verse 2

There's, hungry people on the street, holding signs that say they're dying
While the fat and happy cats are stretched out upon their perch with pride
I don't know, how they got there, and I'm losing sense for trying
I found a cure that is sure to leave you with roses on your mind

Chorus

She's not too tall, not too thin, not quite sure, where to begin
Perfect for, what's in store, and the state of life I'm in
So take a minute to repay all the lovin' that she gave
Cuz when the levy breaks the water, is gonna wash it all away

Verse 3

You know there's roads a-crumbling, because of fault line traffic
And the cookie cutter cities are falling victim to the sea
The strongest gale force winds, are no match for her magic
Through her eye the sun is shining down on me

Chorus

Verse 4

There's holy people waging wars against their very own brothers
Because a book with all the answers claims to force the sword in peace
In all the madness you can't tell one from another
I've got a cure that is sure to lift your thorny crown with ease

Chorus

The Game

Its just a game, its just a game
And it aint easy, no it aint easy no no

Verse 1

But it stays the same, everyday we got bills to pay
They never go away and they say, that its necessary
But you know you got to get your hustle on if your gonna eat today
And I know that you know its getting hard around here trying to live this way

Chorus

Because its hard our here for a pimp, its hard out here for a pimp
And it aint easy, no it aint easy no no

Verse 2

There was a time when everything flowed like wine,
We didn't have to worry which parts were yours and mine
We had enough to go around, and everybody feels just fine, just fine
But those times are over now lord knows, I gotta get back to the grind, just like my
momma said, she said

Chorus

Verse 3

There'll come a time, when your life can push rewind,
Get your feet back on the ground, making up for your precious time
You'll have enough to go around, spreading your love to the passers by
And when the skies are crying out, oh lord, remember theres always a better time, just
like my momma said she said

Chorus / Bridge / Instrumental

Verse 4

But it stays the same, everyday we got bills to pay
They never go away and they say, that its necessary
But you know you got to get your hustle on if your gonna eat today
And I know that you know its getting hard around here trying to live this way

Chorus (ext.) it ain't east, it ain't easy...

Fill Me Up

Verse 1

I was minding my own business when it all just up and changed, seemed the world
around was crumbling
Going through the motions never seems to be deranged until the thread unwinds and
coils up again
We can't slow down and we can't pump the breaks, because they're locking up on me
out there for everyone to see
Together we can navigate the steepest grade in a hydroplane with momentum building,
momentum building

Verse 2

Sometimes it's far too dark to see, like a blanket pulling over me, when it's time to pay
the fiddler I will greet him happily
I've seen sunny days and I've seen the darkest shades of grey, but nothing can contend
with what she's given to me
The path you choose to take and all the loving that you make will build you up or burry
you six feet in the ground
Home is what you make it, as long as you can take it, home to me is where she can be
found

Chorus

So fill me to the brim because contentment is a sin, I'll drink it down, and fill it up
again
Push my worries to the side so happy tears can satisfy the hunger, that I feel
within

Fill me to the breaking point where nothing can contain all the pressure that is
building pains
When my mouth is dry I can rely on you, to fill me up, to fill me up

Instrumental / Chorus

Verse 3

I was minding my own business when it all just up and changed, seemed the world
around was crumbling
Going through the motions never seems to be deranged until the thread unwinds and
coils up again
We can't slow down and we can't pump the breaks, because they're locking up on me
out there for everyone to see
Together we can navigate the steepest grade in a hydroplane with momentum building,
momentum building
Momentum building (momentum building) momentum building (momentum building)
momentum building (momentum building) momentum building (momentum building)

There's a Place

Verse 1

Its early morning, theres a feeling in the air, grey clouds escape you and then
disappear
Sounds awaken, giving rhythm to the day before you, find the beat, it'll open up your
mind
It's all around you, the origins are undistinguished, tune in to find your frequency
It's peaking and its ringing in your head, two takes to find stability

Chorus

There are places in this world, beyond the gold and pearls, where life just seems
to know
Treasures there depend on both eyes to behold, wondering if this is the
place

Verse 2

So familiar, the sun it will deceive, you feel her burning stare through stages of relief
Building tension, pushes forces back and forth before you, send it back home to the reef
Sound the signal, theres warning signs above, take cover because they're waiting,
they're waiting
They'll pick it from your hands, they'll hover happily, chase the dream across the sea

Chorus

Instrumental / 1/2 Chorus

Learning Curve

Verse 1

Spare change sittin' on the counter, like a dime, nickel, penny and a quarter
The count gets less as I get older, my bills get taller but my pay is shorter

Pre-Chorus

All I wanna see, is a time when we can catch up to the learning curve
All I wanna see, is a time when we can catch up to the learning curve
But nothings ever free, nothings ever free

Chorus

I used to think that I could fly, when I had that dream
When I flew way to high I, lost my wings
Addiction, affliction, eviction, suspicion, hadn't found me yet
And all I ever needed to get high, was a swing set

Verse 2

I used to have a He-Man lunchbox
With the Thermos™ brand thermos on the inside
Now it's just an old To-Go box
And a lonely empty bottle by my bedside

Pre chorus

Chorus / Jam / Chorus
