SOLOMON&WU

FORESSO®

An Introduction

Foresso is a new composite material suitable for a wide range of interior applications. It is composed of FSC certified British timber, cement, resin binders, and shavings from planing machines.

We use high quality timber that would otherwise be burned due to its odd size or the inclusion of knots and defects. Each colourway has been designed to evoke a feeling of provenance which can be adapted with custom colours and timbers.

Foresso is suitable for all interior surfaces including flooring and counter-tops.

Enquiries

Please email contact@solomonandwu.com or your local representative with:

- Completed enquiry form
- Technical drawings
- Selected Foresso® colourway or colour references

We will then get in touch with a quote or to arrange a meeting. Email us if you need further information or have technical queries.

Key Information

Foresso is sold as a standard 2.4 x 1.2m sheet material as 5mm of Foresso on 18mm birch plywood unless specified otherwise. Our minimum order is 1 sheet.

Every sheet is handmade to order in the Solomon&Wu workshop with a lead time of 6-8 weeks. If you have a specific deadlines or leadtimes can often be accommodated.

Customisation

Foresso can be made to numerous specifications, including:

- Custom binder colours matched to references
- Custom timber choices including location specific timber
- Seamless edges
- Other sheet sizes
- Custom panel shapes

Upcharges apply for edging, custom sizes, and custom shapes. All custom orders are accompanied by a control sample, please allow an extra 2-3 weeks for custom requests.

Foresso can be CNC milled, joined, cut and processed in the same way as other timber sheet materials. We provide an installation guide and can advise contractors as required.

Sustainability

Foresso is composed of approximately 70% FSC certified timber offcuts and waste from planing machines sourced from sawmills and timber merchants within Britain.

The binder is a mixture of cement, pigment, wood dust and resin containing 0% VOCs.

Care Guidelines

Treat Foresso® as any other timber surface.

- Do not place hot pans directly on the surface.
- Use a non-abrasive, pH neutral cleaner and buff dry.
- Household furniture cleaners are suitable.

Foresso is finished with a hardwax oil to bring out the natural beauty of the woodgrain and to ensure a long-lasting surface. This makes it resistant to water and common stains.

In the event of damage to your Foresso surface, it is easy to refinish. Simply sand with a 320 grit sandpaper to remove marks and then re-oil, following the manufacturer's instructions.

Installation

Please refer to our installation guide or get in touch with the Solomon & Wu Team.
