The IDEA Center is Portage County's resource center for creative arts, business, community impact ventures. Combining co-working, meeting, and maker spaces, we synthesize urban innovation spaces to run a streamlined one-stop model that thrives in small communities.

It's working. The IDEA Center is supporting start-ups, co-workers, internships, meet-ups, makers, and off-site trainings, all expanding the economy in Portage County. With four 3d printers, design software, and video and podcast studios, we are making new technology accessible to the community that needs it. Sponsorship connects your business to this important resource.

**LEVELS**
