

# SOUND SCULPTURE

## Notes:

- “X” marks anchors - small transponders on telescoping, sandbagged (provided) stands. Dotted lines are cat5e cable cable. We provide the cable.
- Cubes 17” on each side, and are made of HDPE plastic, weigh about 7 lbs each and are durable enough to be dropped, stacked and stood on
- “Active” area, within the anchors is ideally 25’ to 50’ square or rectangle
- Control table requires 110v power to run laptop and PA system. Sound System provided by presenter unless otherwise discussed.
- Audio out is balanced line-level XLR from audio interface, stereo R/L only
- Low ambient light is paramount to immersive quality of the work
