Mom Made™ Foods Organic Children's Meals at SuperTargets Nationwide

BOSTON, MASS, October 16, 2008: Mom Made™ Foods organic baby and children's meals will be available nationwide at SuperTarget at the end of this month, the company announced today at the Natural Products Expo East trade show.

“Two years ago I was making organic baby food and selling it at a local farmers market,” noted company founder Heather Stouffer. “Now, thanks to SuperTarget, these healthy recipes from my kitchen will be available to children across the country.”

Mom Made's eight nutritious frozen USDA-certified organic meals for children give parents a guilt-free, convenient way to feed kids foods they love that are good for them. Big kids can choose from the Cheesy Mac or Fiesta Rice Meals or the Bean Burrito and Cheese Pizza Munchies. Mom Made for Baby, organic purées for babies, are available in broccoli, sweet potato, pear, and apple varieties.

The company's three organic product lines are flash frozen to preserve flavor, nutrients, color and natural texture. They contain no preservatives, no trans fats, no added sugars, no artificial colors and are low in sodium.

The Mid-Atlantic's first USDA-organic certified producer of fresh frozen foods for children, Mom Made is available nationwide at SuperTarget and at select leading grocery retailers, such as Whole Foods and Wegman's.
