Digital Bedrock DECLARES “WE ARE STILL IN” ON CLIMATE ACTION

Digital Bedrock joins over 3,750 cities, states, businesses, and institutions supporting climate action in line with the Paris Agreement

(Los Angeles, Nov. 6, 2019) - **Digital Bedrock**, a secure digital preservation service, has joined **We Are Still In**, the largest and most diverse American coalition ever assembled in pursuit of climate action. We Are Still In gathers mayors, county executives, governors, tribal leaders, college and university presidents, businesses, faith groups, cultural institutions, healthcare organizations, artists, and investors from across the country to show the world that America is “still in” and is committed to meeting its goals under the Paris Climate Agreement.

Digital Bedrock’s infrastructure and workflow were purposely built to have a small carbon footprint and utilizes green technologies. CEO Linda Tadic frequently speaks on digital preservation’s impact on the environment. Her presentation, which is updated every December, can be found here: [https://www.digitalbedrock.com/resources-2](https://www.digitalbedrock.com/resources-2).

We Are Still In was launched in June 2017 in response to President Trump’s announced intent to withdraw the United States from the Paris Agreement, which was signed in 2015 by world leaders as the first global commitment to fight climate change. The coalition has now grown to represent 155 million people and over $9 trillion in GDP, while covering all 50 states.

In the U.S., it is local, tribal, and state governments, along with businesses, that are primarily responsible for the dramatic decrease in greenhouse gas emissions in recent years. In the absence of leadership from Washington, these actors are working in their local communities to demonstrate America’s leadership on climate change and clean energy.

By signing the **We Are Still In Declaration** and joining the coalition, **Digital Bedrock** has committed to:

- Recognizing the economic and public health benefits of climate action
- Pursuing ambitious climate goals, regardless of federal leadership
- Working collaboratively, with signatories and other partners, to take forceful action
- Maintaining American leadership through engagement with the international community

We Are Still In is a joint declaration support for climate action, signed by more than 3,750 CEOs, mayors, governors, college presidents, and others. The organizations they represent comprise the largest and most diverse coalition of actors ever established in pursuit of climate action.

Let’s work on this together, on all fronts. Learn more and join the movement: [wearestillin.com](http://wearestillin.com)
About Digital Bedrock

Digital Bedrock provides secure, managed digital preservation services in an offline architecture. Digital Bedrock (digitalbedrock.com) offers a unique, long-term digital asset preservation strategy across a wide variety of industries, from media and entertainment, academic institutions, government agencies, businesses with intellectual property, to cultural heritage organizations, at a competitive price and with an unparalleled level of service.

The company creates complex metadata about an asset’s characteristics and dependencies, identifies long-term vulnerabilities, and monitors asset health over time by performing scheduled, bit-level fixity checks. Offline redundancy on LTO7 is provided in three geographically separated locations, with assets migrated as new storage media become available.

In addition to its core preservation services, Digital Bedrock also offers software development and consulting services. More information at http://www.digitalbedrock.com.
