1. Most titles of the price books are entirely capitalized in the original. I have based my interpretations on a sympathetic reading and a desire for clarity.

2. Most titles include a street address after the name of the printer or publisher. These have been omitted.

3. Most titles of price books omit state names. Where the town or city is potentially obscure, I have indicated the state in brackets, in abbreviated form.

4. The body of each abstract follows the headings in the corresponding rule book as closely as possible, (and practical). Parentheses indicate a sub-heading, a particularly interesting detail, or a correct spelling where the original is incomprehensible.

5. All original spellings have been retained.

6. Numbers from the Evans and Shoemaker bibliographies are included. The Library of Congress and the Boston Public Library have the full Evans microprint series. Further, the Library of Congress has the Shoemaker microprint series through 1813 and the
Boston Public Library has the series through 1814. Both plan to acquire the rest of the series in the near future. Boston Public Library has the equipment to make xerox copies from microprint. Library of Congress does not. If a book is in either of these series, I give the Evans or Shoemaker number and do not list libraries where the microprint is available, as it would be repetitive.

7. It may be helpful to note that Henry - Russell Hitchcock includes only William Pain, William Norman, John Haviland and J. Wilson in American Architectural Books as containing price books. After the Wilson entry, Hitchcock says, "Most other price books of this order have been omitted …"

8. There were probably some price books published after 1872. But I feel that with our last entry, we are already leaning towards the modern estimation guides, as opposed to price books in the strict sense. Therefore, I did not search for later entries, beyond a check of the Library of Congress shelves.

9. It should be noted that general access to CCCP items is not available.

Carpenters Company
The Journeymen Cabinet and Chair-Makers Philadelphia Book of Prices. 

This should be included in the list for two reasons. One, several price books have the word cabinet maker in the title and include price information for various furnishings. Two, many price books that do not include cabinet maker in the title have prices for shelves, cupboards, store counters, etc.

OW Carroll discovered this entry on microprint at the Boston Public Library, which means it is probably in Evans and the microprint is also available at Library of Congress. If not, Orville Carroll should be contacted for the source. An excerpt from this price book is in the miscellaneous notes section of the rule book file.

Not in Evans.

NOTE: Information from Louise Hall, B-41-2

American Antiquarian Society
At a general Meeting of the House-Joiners and Cabinet-Makers in the County of Hampshire, held at Hatfield, on the second day of March, 1796, --- when they agreed on the following prises or Work, viz.---- [ ,Mass.?], 1796. Broadside.

Prices for cabinet work (prices printed; US currency) includes desks; bookcases; cases with drawers; clock case; tables; candle stand; bedsteads; cradle; coffins; sleighs. Per diem calculations for carpentry work begins with an explanatory paragraph: "The following estimate, shewing how much of the various kinds of Work, herein mentioned, is a Day's Work; was agreed to as a rule to calculate Work by the Job, which may be a great benefit to Workmen and Employers, more particularly to Young Workmen who are liable to be deceived) to the great damage of themselves and other Workmen." Includes per diem calculations for building stages; boarding and shingling roofs; gutter; saddle boards; fascia; shingling around chimneys; putting up solid window frames; boarding sides; chamfer; shot and rabit; covings (plain, Tuscan, Dorick, Ionick); Venecian windows (plain, Tuscan, Ionick); floors; rough partitons; mop6ards; has and sub-bass (Tuscan, Doric, Ionick); plain dado; casing of inside doors; doors; stairs; wainscot; sashes.

Abstracted from Evans #30547. The Evans' entry cites "Butler" as the printer of this broadside, but the microprint copy does not list a printer. In "Artificer to Architect in America" (unpublished Ph.D dissertation, Harvard University, 1954), p. B-43, Louise Hall states that there is a similar broadside to the “Butler edition,” also published in 1796, the printer of which is unknown. Further, Louise Hall maintains that a copy of the “Butler edition” has not been located. This inconsistency is not understood.

Evans #32237
The Practical House Carpenter's Directory: Containing, a General List of Prices for Labour; Arranged in Alphabetical Order, and Interspersed with Useful and Important Notes. West-Chester [Pa.]: Printed for the Proprietors, by Derrick & Sharpless, 1797.

Chester County Historical Society

Bill of Rates of Carpenter and House-Joiner Work, Settled and Agreed on, by the Subscribers, Chambersburg, April 13th, 1790. To Which is Affixed an Appendix, by Other Subscribers, Chambersburg, December, 1799. Chambersburg [Pa.]: Printed by Robert Harper, 1799. 13 pages; 1790 and 1799 membership lists; rules of measurement, 1799; 1790 note that "It is agreed on that twenty per cent. be added to the above bill for boarding."); 1799 note "To Boarding, charge from twenty to thirty per cent. as the price of grain may be."

Bill of Rates, &c. (prices printed; English currency) includes joises (joist); framing rafters; lathing; door-frames; window-frames; cornice; boxing eves; eve spouts; barge-boards; window shutters; doors; wainscoting; cupboards and shelves; architrave; surbase and wash-board; jamb-casing; sash-casing; sash; window boards; pilasters; frontispieces; Doric order; flooring; cealing; lining walls; bracket stairs; string-boorg stairs; common plain winding stairs; fire kirbs; weather boarding; cutting out door and windows and pinning in frames, log houses; tabernacle frames; short porch; shop shelves, drawers and counter. Appendix begins with note, "Experience has discovered, that the foregoing Bill of Rates is deficient in two respects. First, the manner of measuring of sundry pieces of work that are inserted, is not thereto annexed: and secondly, that many pieces of Work are entirely omitted, to supply which, this Appendix is intended, by the subscribers."

Prices of Work omitted in the foregoing Bill of Rates (prices printed; English currency) includes entries which expand on many of the items in the Bill of Rates proper, and framing chimney pieces; dorment windows; columns (Tuscan, Dorick); entablature; lattice work; Chinese work; lintels; framing barns, and small and large houses; racks and mangers.

Evans #35292
OAHP Library
The Rules of Work, of the Carpenters, in the Town of Boston. Formed and most accurately corrected by a large number of the first workmen of the town. Published agreeably to Act of Congress. Boston: Printed for the Proprietors, 1800. 30 pages; introduction; membership list of the committee, signed by the secretary, Thos. Stutson; index.

The Rules of Work, of the Carpenters (prices printed; US currency) includes framing floors of all kinds; framing sides and ends; small framing; framing roofs; framing middles; rough boarding; window frames of all kinds; window caps outside; sashes of all kinds, and hanging dit.; clapboarding; butting and scribing; shingling crippels, gutter boards and weather boards; fascia under eaves; water tables, corner boards and saddle boards; rustic corners, fronts, plain sheathing and belts; trunks and gutters; casing coveing, and cornices of all kinds (Tuscan, Doric, Corinthian, Gothic); outside pedestals, and pilasters; luthern windows; turrets; frontispieces, and porticos of all kinds (Tuscan, Doric, Ionic, Corinthian); outside door cases for brick walls; outside cellar doors; rough partitions, rough ceilings., and rough furrings; inside door cases; casing outside doors; double doors and shutters, with boards planed to a thickness; casing windows; casing timber; planed partitions, batted doors, and shutters; architraves and mouldings; inside door caps (Tuscan, Doric, Ionic, Corinthian, composite); inside window shutters; fastenings; stairs of all kinds; wainscoting, dadoing rooms and stairs; finishing windows, inside; doors of all kinds; chimney pieces, casing, &c.; linings in rooms and closets, with their mouldings; floors of all kinds; mop boards; fences, posts, gates, &c.; blinds; cants on walls.

The Library of Congress copy was originally owned by Wm. Sharrell. It contains several pages of hand written notations. One page (dated August 12, 1829) dealing with general fees for painting; plastering; digging; cellar stone; ashler; brick work; slating; carpentry. Two handwritten pages (no date) of Rules for Measuring Painter's work unanimously adopted by The Painters of Boston. Includes fees for modillions; dentals; mopboards; cornices; capitals; fluted and pannel work with mahogany; edges on shelves. One handwritten page (dated Jan. 29, 1829) of Rules for Measuring Slating adopted by the Slaters of Boston.

The Boston Public Library Rare Book Room copy was originally owned by Peres Loring. It contains sixteen pages of handwritten notations including Prices of Painting and Rules of Measurement for painters of Boston, 1815; Slater's Rules of Measurement (no date); additional information on Cisterns, blinds, stairs, etc.

The Constitution of the Incorporated Practical House Carpenters' Society, of
the City and County of Philadelphia: Together with Rules and Regulations for Measuring
and Valuing House Carpenters' Work. 1812. Incorporated June 29, 1811. 1812. 82 pages;
introduction; constitution; membership list; note on measuring floors of joists; plates;
index.

Rules and Regulations for Measuring and Valuing House Carpenters' Work by the
Philadelphia Practical House Carpenters' Society begins with the following: "Designing
and Drawing for Buildings, bills of scantling for the same, procuring and piling materials,
&c. to be charges in proportion to the trouble." Price list (prices printed; US currency)
includes framing floors of joists; girders; roofs; shingling; dormers; skylights; circular;
skylights, flat on roof; door frames; inside door frames; window frames; weather
boarding; flooring; partitions; doors; pannel doors; shutters; Venetian shutters; sashes;
show windows; circular; wainscot; wainscot or church pew work; stairs (winding, open
newel stairs); geometrical stairs; cornice; level cornice; architraves; pilasters; door and
window pilasters; pediments; skirting; shelves; quoin strips and closet casings; mantles;
outside door pilasters; tabernacle frames; flats; balconies; lattice work;
lintles; cellar door; porches; gutters; trunks or conductors; fences; capping fences;
palisade fence; capping walls; gates in walls; gates in pasture; centres; racks (including
mangers, stalls); stables; cisterns for breweries, sugar houses and distilleries; well kirbs;
ladders; pilasters and columns; Ionic pilasters; Corinthian pilasters; composite, drawer
nests: pp. 19-77.

Note that this is one of the few illustrated rule books, with drawings by the architect
William Strickland and engravings by W. Kneass.
