

Cut paper lengthways into long strips of different thicknesses

HOSPITAL ROOMS

Cut across these black lines using scissors

If you are using Scissors, fold the page in half and cut across the lines - don't go up to the edge of the page as it needs to hold together in one piece

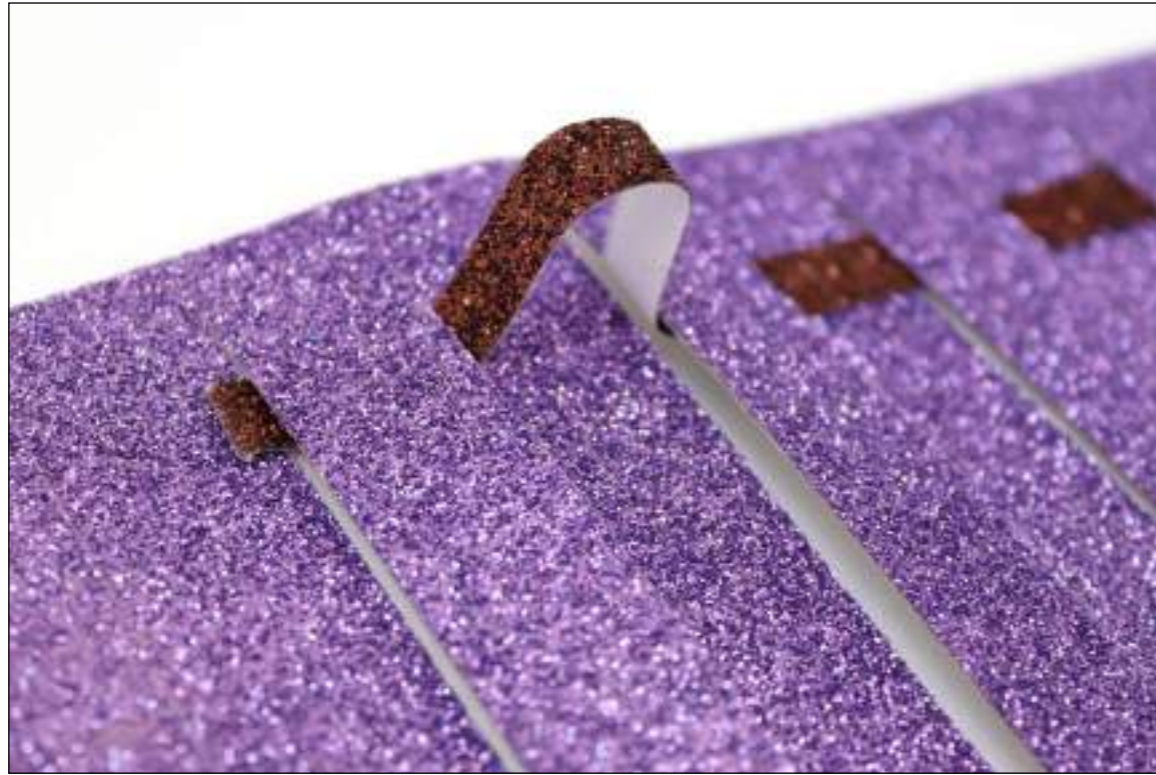

You will need:

- A4 coloured card
- A4 Cutting Template (on next page of pack)
- A4 glitter card - torn or cut into long strips before the workshop
- Scissors (or you can tear)
- Glue stick
- HB Pencil
- Ruler
- Scissors

*NOTE: This activity can also be recreated using plain coloured paper - it does not have to be glitter paper.

To prepare your base paper which you will weave into, print the template out onto A4, or draw by hand using the measurements on the next page.

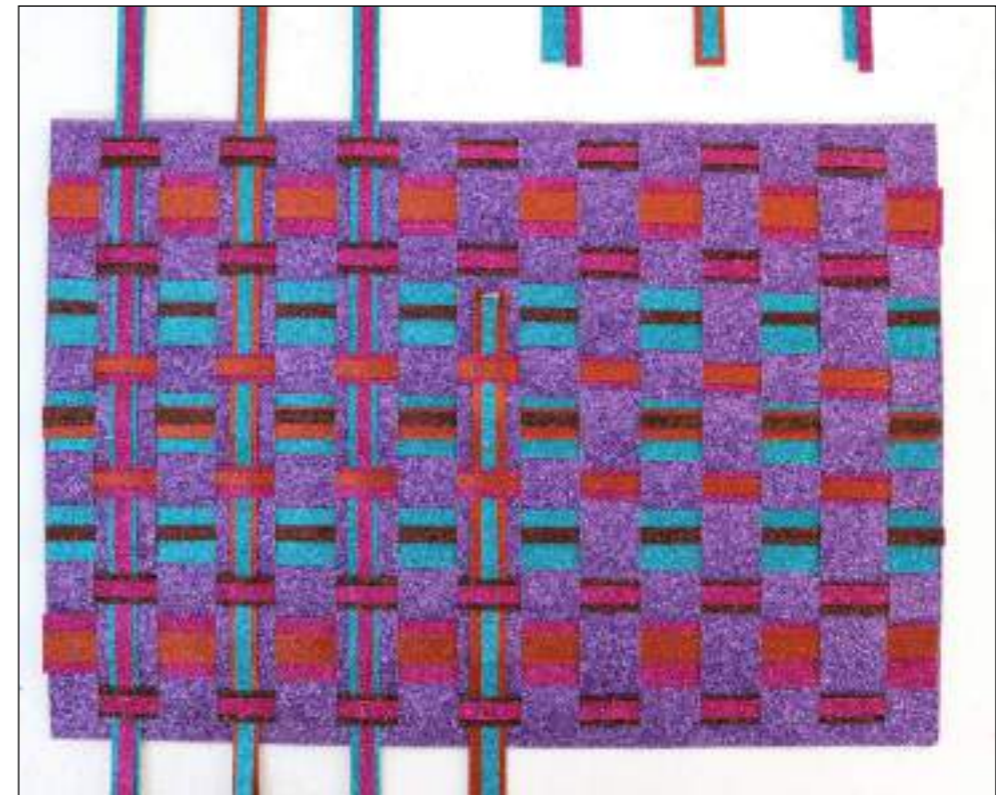

HOSPITAL ROOMS

Weave the strips in and out of your base paper

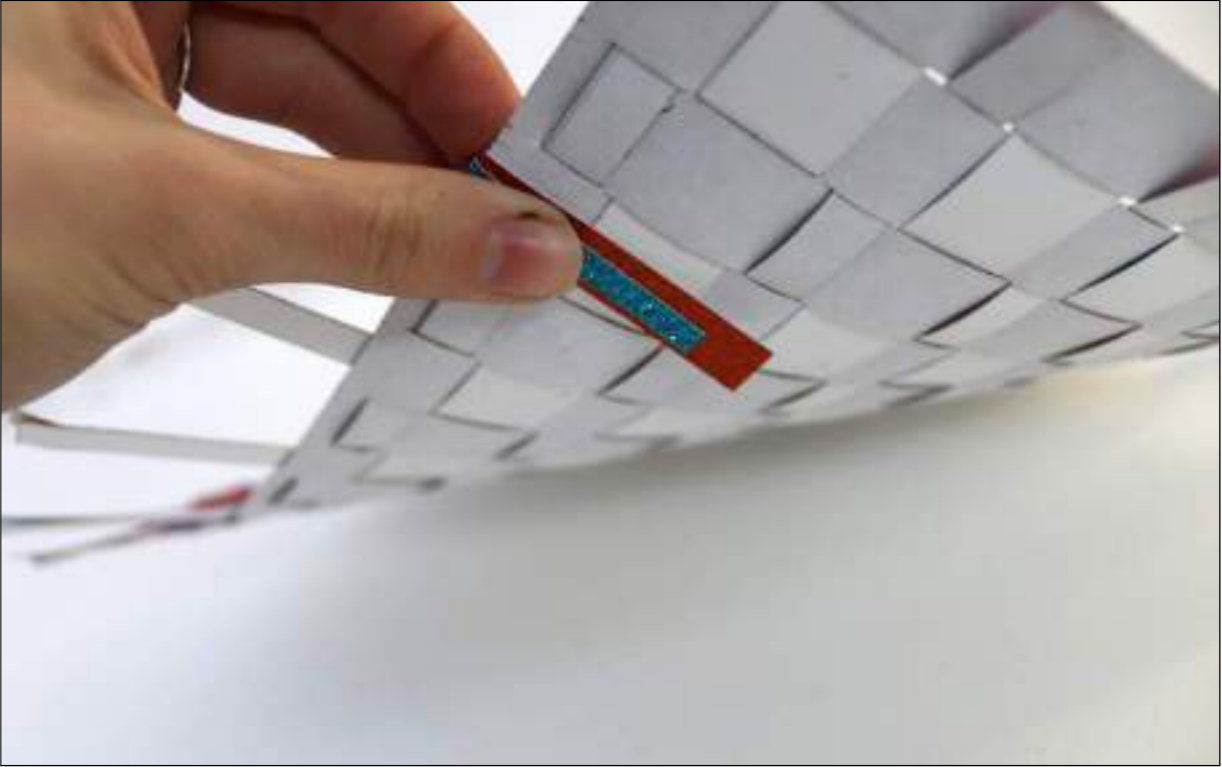

Layer colours to create textures!

When you've built up your work you will see a pattern start to form

HOSPITAL ROOMS

Fold any excess underneath and glue down on the back
