

Ski bootfitting is extremely important for a comfortable and precise ride. Our experts will adapt your ski boot to the precise shape of your foot.

Our fitters Florian, Nicolas and Alan are on hand to help answer any questions.

WHO NEEDS IT ?

Everybody benefits from this service, whatever their ski level.

HOW DOES IT WORK ?

If you are looking to get some new ski or ski touring boots, the first thing we do is start by collecting your measurements, such as length, volume, height of your feet and skis. Then we narrow down the best election of boot to match your foot.

We spend a lot of time talking to the customer and discussing how the boot feels and fits to ensure the best possible result. Even if you already have your boots, we can still help adjust them, to make them more comfortable and more efficient.

The team at Snell have years of experience and expertise fitting boots and are always happy to help!

THE EVALUATION

- Measure your feet
- Check the foot and inside the boot's shell
- Verification of possible plastic punch
- Fitting the boot
- Discuss at length how the boot fits and feels
- The possibility of customization of the liner and/or making of a custom sole
- We test the boot to check the overall fitting and where necessary, make further adjustments. The real test, of course, is on the slopes, and should the customer feel the need for further changes, we are happy to fine tune, until it is perfect

HOW MUCH DOES IT COST ?

Our fitting service is included in the price when you purchase your boots from Snell. The quality of the liners and the development of new plastic helps us to work the entire boot for a perfect fit, working the plastic shell and the liners.

OPTIONAL EXTRAS

- We offer a custom sole, to stabilize the foot inside the boots
- Injected liner
- Heated soles or heated socks, for cold days
- Fixing boots, punching and spare parts
- All of these services are available for boots not purchased or purchased from Snell Sports
