## About Event

**Maritime2020** is a unique international platform dedicated to tackling the biggest challenges the industry is going to face when new IMO regulations come into action. The event gathers top-level executives, industry leaders and government representatives from all areas of Maritime, such as shipowners, shipbuilders, ports and terminals to present their views and expertise on the most pressing issues. Maritime2020 brings diverse perspectives covering topics that range from global market trends to fuelling solutions and innovation in the Maritime industry.

This exclusive event prepares industry professionals with solutions for any obstacles impeding regulations may pose.

## Key Topics

**In 2016, the IMO Marine Environment Protection Committee meeting agreed on a global fuel sulphur limit of 0.5% which will enter into force in 2020.**

How will these regulations affect the global market?

Are current market conditions good enough for new regulations?

**Who should feel the biggest responsibility for IMO regulations implementation?**

Governments and organizations or companies?

How to work with each other to achieve the best results?

The role of shipowners, shipbuilders, ports.

**IMO regulations from shipowners' perspective.**

Can it not only reduce pollution but also bring cost-effective solutions for shipowners?

There are two years left until IMO regulations come into force, how much have shipowners prepared for it?

What are the biggest issues shipowners face?

**What is the support for institutions which have to adopt new regulations?**

Examples, advice and financial support opportunities. Good practice experiences.

**Anshul Tuteja**  
Director, Energy Management

Fueling Solutions to Meet IMO Global Sulphur Limits

TOPICS TO BE DISCUSSED

- Alternative fuels perspectives
- Fuel diversity and alternative marine fuelling solutions
- Will IMO impact bunker fuel availability?

Market outlook for 2020

TOPICS TO BE DISCUSSED

- IMO regulations affect global market
- Fuel diversity and alternative marine fuelling solutions
- What awaits for marine market after 2020?

Innovation and Technology Transfer

TOPICS TO BE DISCUSSED

- Newest solutions which can help implement new regulations
- What is a bigger problem: technical side or crew training?
- Retrofit vs new vessels

17:30-17:35 [Closing remarks](#)

- 14:40-15:00 [AVAILABLE SLOT](#)
- 15:00-15:20 [SPONSOR SLOT](#)
- 15:20-15:50 [Coffee Break](#)
