

PUBLIC NOTICE

Benton Street Rehabilitation Project

Construction Traffic Impacts

Notice to Proceed-June 21, 2018

Scheduled to commence work July 09, 2018

As of June 21, 2018, Colville Confederated Tribes Department of Transportation will be working with Cates & Erb, INC to remove and replace existing road surface from the intersection of Benton St. & 5th Ave E. south to the Community Center and Indian Health Services. This will include a redesign of the parking layout to maximize the parking area, construction of new concrete sidewalk with solar lighting to provide a safe walking path for pedestrians walking to and from social service areas. Also, an upgrade to the storm water drainage infrastructure to meet today's needs and specifications.

We will work together to appease local traffic flow in and out of the construction zone, while accessing the social services during construction. We would like to ask for your help in parking your vehicles in designated areas during the construction phase.

Thank you very kindly,

-CCTDOT Staff members
