Vocational Rehabilitation program has been very supportive and helped me develop a plan to achieve my goal as I am currently employed full time and almost graduated with my first degree. They supported me every step of the way. They purchased me a laptop for my classes and paid for my first quarter of tuition to get me started on my degree, they helped with car repairs needed to get me to my classes. I was nervous to start pursuing my degree and did not know where to start so I always put it off. Once I got into the Voc Rehab program I had an appointment to develop my plan, during that meeting we went over my options and what I was interested in doing. I chose to go to school and my primary goal was to become a counselor in the future. My VR counselor went through all my steps and a timeline to

achieve my goal. VR gave me confidence and hope that I could achieve my goal and that they were here to help along the way.

-AB

I am very thankful for the Voc Rehab program for helping me get to where I am at today.

My counselor helped me develop a plan to achieve my goals. The program also got my laptop and paid for my on-line office assistance classes.

Now I am employed full-time in an office and they are offering to continue to support my training and development.
