

Blended Vocabulary: Digital Tools and More

Presented by Dr. Angela Peery

Brief Description: The Blended Vocabulary model consists of creating a schoolwide culture of word learning, providing direct and indirect instruction, and using digital tools to boost student achievement. In this session, learn about how to start or sustain a schoolwide effort focused on word learning. Experience a specific protocol for selecting vocabulary to teach and assess, review why strategies like frequent read-alouds are still critical, and try out several digital tools that can be used in the classroom to make vocabulary learning more fun than ever.
