

# Collaborative Teacher Teams 2.0

**Presented by Dr. Angela Peery**

**Brief Description:** True collaboration among teachers has direct, positive impact on student learning. However, many teacher teams do not reap the full benefits of collaboration. Some teams are merely doing "collaboration lite." In this session, we will explore the stages of team development and examine what highly effective teams do. Practical ideas for helping teams develop norms, assess meaningful outcomes, and make innovations in instruction will be shared. A recommended resource for this workshop is "The Futility of PLC Lite" by Richard DuFour and Douglas Reeves.
