

# Creating Learning Cultures

**Presented by Lisa Almeida, Dr. Brandon Doubek**

**Brief Description:** This session will explore the subject of school and district culture as it relates to inquiry and learning. As a part of this discussion the session will examine both the roadblocks that impede our progress, and the three big ideas that should guide our work. The session will also emphasize the critical role of improvement teams (at each level of the system) and how these teams can accelerate the progress of every school.
