Skills

Hand Sketching, Rendering (Sketchbook Pro)
Prototyping, 3D Printing, Iterative Testing
3D CAD, Design Development, Design for Manufacture (SolidWorks, Rhino)
Product Visualization, 3D Rendering (Keyshot, Adobe CS)

Experience

Consulting for Berlin (the market leader in custom packaging solutions) to develop ergonomic, functional and brand relevant solutions for their many clients.

As lead designer for the SwannOne Home security hub our team defined an aesthetic framework for a whole ecosystem of products, brought the hub through commercialization, and won gold in the Good Design Awards (Consumer Electronics).

Lead Industrial Designer for PepsiCo account - Primary team member in the conception, development and commercialization of Pepsi's future beverage dispense equipment.

Lead designer for Kenmore Dishwasher account. Responsibilities include: design management, creative direction, concept development, design for manufacture, client relations, delegation, proposals and billing.

Extensive experience working directly with engineering and upper-level management on commercialization. Particular expertise in maintaining design intent through the engineering process.

Keen understanding of the cultural context of my work and the interplay of form and function as it relates to consumer experience.

Frequent interactions with executives and upper level management within corporations has given me rare exposure to the role and potential impact of design within the modern business and corporation.
