

What is a REFUGIUM?

A refugium (pronounced "re-few-gee-um") is a part of your aquarium and filter system kept separate from the rest of your aquarium, so that several beneficial additions can easily be made to the tank.

Why should I add a REFUGIUM to my system?

Feed your tank right - Provide more abundant and diverse live food sources such as copepods and amphipods for existing tank inhabitants and finicky eaters like Mandarinfishes.

Naturally filter your water - Dramatically lower your nitrate and phosphate levels and export excess nutrients from your system by growing and harvesting macroalgae.

Provide refuge - Delicate species such as some of the pods mentioned before need an isolated area such as a refugium where they have a chance to thrive and multiply. Larger refugiums can also be used to help acclimate new fish to the aquarium or to separate fishes that have problems cohabitating.

Stabilize your pH - Keeping your refugium lights on when your main lights are off will keep the macro algae in your refugium consuming and processing CO₂, thereby reducing common "nighttime" pH fluctuations.

Bigger is better - Adding a refugium will usually add more water to your entire system making it easier to keep water parameters stable.

CPR AQUATIC, INC

Refugiums Models

Each CPR refugium is made in the USA with the highest quality domestic cast acrylic. All AquaFuges are available in **deluxe** models, which include a light and light stands. Users can choose from mud, aragonite or a combination of substrates. Please ask your retailer for more information on how to set up a refugium, or visit www.cprusa.com for more information.

HANG-ON-THE-BACK MODELS

- Easy to set up 'hang-on' design; no additional plumbing required
- Great supplement to any aquarium system
- Powerhead included for inflow; gravitational return to tank
- Black background limits light transfer between refugium and tank
- Combination units with built in protein skimmer available (AF2PS)
- Three AquaFuge2 sizes available: • Two AquaFuge2 PS sizes available:

13"L x 4.5"W x 12"H (S)

19.25"L x 3.75"W x 14.6"H (S)

19"L x 4.5"W x 12"H (M)

23.5"L x 3.75"W x 14.6"H (L)

25.5"L x 4.5"W x 12"H (L)

AquaFuge 2

AquaFuge 2 PS

SUMP BASED MODELS

- Large refugium area for diverse biotopes
- Pre-filter bag and holder included for simple mechanical filtration (AFMP)
- Combination units with built in protein skimmer available (AFPRO)
- Additional chamber to add bag media for chemical filtration (AFPRO)
- Three AquaFuge MP sizes available: • Two AquaFuge PRO sizes available:

26"L x 10"W x 12"H (S)

32"L x 12"W x 14.5"H (S)

30.5"L x 12"W x 14"H (M)

36"L x 12"W x 16"H (L)

36"L x 12"W x 16"H (L)

AquaFuge PRO

CITR IN-TANK REFUGIUM

- Simple in-tank design with dedicated circulation pump
- Isolate in-tank macroalgae growth
- Protect new tank additions while acclimating to the rest of the inhabitants
- Two sizes available: 7.75"L x 4"W x 7.5"H (S) and 12"L x 6"W x 8"H (L)
