

INTRODUCING

THE IMPACT FUND

A new and improved investment opportunity!

The new Impact Fund, launched July 1, 2016, seeks to invest only in the equity of companies that build their business with an eye toward positively influencing the environment and society. Investments are directed by money managers who have demonstrated expertise and skill in "positive social impact investing" and ESG (Environment, Social and Governance).

Research shows that these investments have out-performed other companies using negative screening (avoiding companies engaged in undesirable activities such as alcohol, tobacco, or firearms) while creating a positive impact and long term value for our constituents and churches.

Impacting social issues has been a part of Methodism since its very beginning. John Wesley—whose concern for the poor, the sick and the imprisoned is well documented—considered social outreach to be an obligation of a Methodist.

The Impact Fund is different in that it seeks to invest only in the equity of companies that build their business with an eye toward positively influencing the environment and society. Investments are directed by professional money managers who have demonstrated expertise and skill in “positive social impact investing” and “ESG investing” (Environment, Social and Governance).

* Projections had the fund been in existence, using actual historic returns of the managers involved
