The CQI PARTNERSHIP FOR GENDER EQUITY

LEARNING & INNOVATION HUB
Measuring gender equity

Supported by the Global Coffee Platform
The Learning and Innovation Hub is an initiative of the Partnership for Gender Equity (PGE) to convene industry leaders and practitioners around issues, practices, and investments related to gender equity in the coffee sector. Aligned with the Global Coffee Platform’s Collective Action Network, the PGE Learning and Innovation Hub will bolster industry commitments to collective action for driving sustainability and resiliency at origin.

The PGE Hub will be made up of several thematic groups based on the areas of interest of stakeholders. This first thematic group builds on the process that PGE facilitated to create the Common Measurement Framework (CMF) and will focus on efforts to measure gender equity. Both the CMF and the Hub are grounded in the recognition that the coffee industry will have a deeper understanding of the relationship between gender equity and sustainability if we collaborate on how we collect data and measure impact.
Purpose of the Hub

LEARNING  SHARING  TAKING ACTION
Learn concrete and effective techniques, information, and methods for measuring gender equity and using the data to inform and improve operations, productivity, and impact.

Share innovations, results, and experiences so that everyone can learn from them.

Collectively take action by leveraging each other’s efforts and collaborating on common initiatives for measuring gender equity.
Why join the Hub?
Direction
Receive guidance from diverse perspectives and experiences on how to make your company's commitment to gender equity a reality.

Information & Tools
Access information about best practices and industry benchmarks for measuring gender equity as well as tools and resources for how to apply those practices.

Recognition
Get opportunities for public recognition of your company's innovations, successes, and thought leadership.
Engagement

People have different needs and preferences for how they engage with a network and access information. Therefore, the Hub will use multiple channels for communicating and sharing information, including:

- E-newsletters
- Informational slide decks (like this one)
- Webinars
- Slack
- In-person meet-ups
Coordination

Lindsey Jones-Renaud of Cynara Development Services will be the community manager for the Measuring Gender Equity Hub, working closely with Kimberly Easson, Strategic Director of the Partnership for Gender Equity.
“Sign me up!”

There are two ways to participate:

1. #GenderMetrics Slack Group
2. Monthly E-newsletters
