Google Maps may be used to determine the latitude and longitude of a project site:

1. Begin by locating your spot on the map.
2. Right click while your cursor (arrow icon) is hovering over your site.
3. The top numbers displayed are the latitude and longitude for that location.
4. Click on these numbers and google map will copy them to a clipboard.
5. Right click on the application and select paste or hit “control V”.
