

CATCH THE KING

TIDE CAPTAIN QUICK GUIDE

What is a Tide Captain?

A Tide Captain is a self-appointed 'team leader' for Catch the King. They help recruit and manage volunteers, lead practice mapping sessions in their region, and serve as a point of contact for their mapping team - before, during, and after the event. Experienced Tide Captains also receive access to more functions of the app.

What resources should I use as a Tide Captain?

Tide Captains should be familiar with the following websites and tools to help them with training, practice events, and organizing mappers for Catch the King:

- [Wetlands Watch App FAQ Page](#) - a hub for all of your Catch the King/app questions and resources including training resources, how-to guides, mapping locations, and more.
- [NOAA Tide Prediction Sites](#) - explore the map to view tide predictions at certain times and dates near you, and determine your region's window for high tide mapping.
- [Sea Rising Solutions Web Portal](#) - access your regions and events on the Sea Level Rise app's web portal! You can use the Wiki or email functions to connect with your team.

Scan the code find these resources and more!

How do I become a Tide Captain?

Anyone can be a Tide Captain! Reach out to Gabi Kinney (email below) and share (1) what region or group you plan to lead; (2) how many volunteers you can or currently manage, and; (3) your experience with Catch the King. You don't need an active team of volunteers to be a Tide Captain.
