

# "LET ME GROW UP" CAMPAIGN

Right now, our Senators are behind closed doors deciding the future of healthcare in this country. The American Health Care Act would slash \$839 billion from Medicaid, reintroduce lifetime caps, and eliminate protections for people with pre-existing conditions.

Tennessee children are the future of this state, and their voices are critical in the fight to protect Medicaid. It's time to give children in this State a platform to reach Senator Corker and Senator Alexander, so that they can make their plea for the health care they need to grow up.

## WHAT

**A social media campaign featuring videos of children with messages for our Senators.**

The video will feature the child saying the following:

- Parent/Guardian: "What do you want to tell Congress?"
- Child: "My name is \_\_\_\_\_. I'm \_\_\_ years old. I like to [Hobby] and I want to be \_\_\_\_\_ when I grow up. I have [Health issue] Let me grow up!"

## WHO

**Children under age 18 who have health problems and are willing to be videotaped pleading with our Senators, saying "Let Me Grow Up."**

This includes: (1) children on Medicaid  
(2) children who could reach their lifetime caps  
(3) children with pre-existing conditions

Be sure to include the hashtag #LetMeGrowUp and post the video to your social media platforms.

## NOW!

**Tennessee children deserve to grow up strong and healthy. Let them take action and tell their Senators, "LET ME GROW UP!"**
