# "Trash"
Card Game

(Sequencing Numbers from 1 - 10)

*Each player deals out their own 10 cards face down in two rows using one deck of cards. Place the rest of the deck down to be used as the draw pile.

Draw   **TRASH**

| 9 | | K |

* Player 1 takes a card from the deck and tries to place it in one of their card positions. (For example, if a player draws a **9,** then they will put that card in the **ninth** position.)

* Once they put the card in that position, they turn over the card they replaced to put it somewhere else in their sequence. (For example, if the card they replaced is a **2,** they can put that card in the **second** position)

* If a player can not use the card drawn or turned over, it goes in the TRASH. (a pile next to the deck) Immediate TRASH cards are *Kings, Queens, Jacks.* Then Player 2 picks up a card from the draw pile, and tries to place it in one of it's position. Play continues until a player gets all his cards in sequential order from 1 (Ace) to 10.
