

OFF-GRID APPLIANCE PROCUREMENT INCENTIVES PROGRAM PRELIMINARY LIST OF ELIGIBLE REFRIGERATORS

The Global LEAP Off-Grid Appliance Procurement Incentives program accelerates the global off-grid appliance market by providing **incentives to appliance manufacturers and off-grid solar distributors** that partner to distribute large quantities of winning and finalist products from the Global LEAP Outstanding Off-Grid Appliance Awards (**Global LEAP Awards**).

The program's second round will be open to companies that distribute winning and finalist products from the 2015-16 Global LEAP Awards **Television (TV)** and **Fan** Competitions, and the 2016-17 Global LEAP Awards TV, Fan, and Refrigerator Competitions in **Bangladesh, Kenya, Tanzania, Uganda, and Rwanda**.

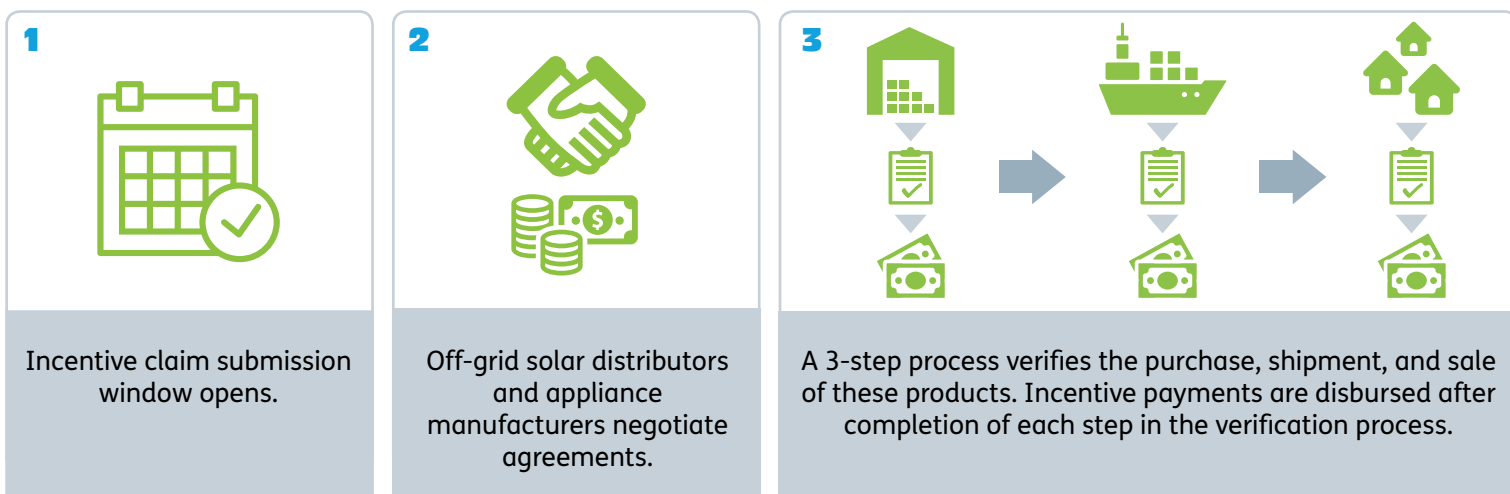

Global LEAP anticipates that the upcoming incentive window for refrigerators will open in **January 2018**. To ensure that suppliers and distributors can initiate procurement discussions in advance of that date, Global LEAP is making available a list of products that were nominated for the 2016-17 Global LEAP Awards Off-Grid Refrigerator Competition, successfully passed an initial screening, and are now undergoing laboratory testing.

All Global LEAP Awards nominations are tested according to internationally-accepted laboratory test methodologies to confirm their energy performance, durability, and reliability, and are also evaluated by a panel of off-grid market experts. **Only products that complete the testing and evaluation satisfactorily are eligible for incentives.**

All potential participants in the Off-Grid Appliance Procurement Incentives Program should therefore consider this list **preliminary**. The product performance data included here is the rated data provided by the manufacturers of the nominated products. Global LEAP cannot confirm this performance, nor that the products will be eligible for the incentives, until the laboratory testing and evaluation process is completed.

How It Works

Each round of incentives is open for a limited time only, and is available on a **first-come, first-serve** basis.

The following products are nominees for the 2016-17 Global LEAP Awards Off-Grid Refrigerator Competition. These products were approved for inclusion in the Competition following an informal, preliminary review and are now undergoing laboratory testing.

Their inclusion in the list below does not constitute a guarantee of their rated performance and should in no way be construed as an endorsement by Global LEAP or its partners. Nor does it constitute that the products have Global LEAP Awards Winner or Finalist status.

Winners and Finalists of the Competition will be announced in January 2018, and only Winners and Finalists of the Competition will be eligible to participate in the forthcoming Global LEAP Off-Grid Appliance Procurement Incentives program.
