 Inseam: Measure from base of crotch down inside of leg to desired pant length.

Refund & Exchange Policy
 Your complete satisfaction is our priority. If you are not fully satisfied with your CrewBoss product for any reason simply return it within 45 days of invoice date. We will refund the full purchase price (less shipping & handling) or exchange for another size or style. All returns must be unworn, unlaundered, and have all manufacturers tags attached. All returns and are subject to final inspection at our Eugene facility prior to a refund or exchange being processed.

Garment Defects
 Any defect claims must be made within 1 year of the date of manufacture, which is located on the certification label inside every CrewBoss garment. All claims must be accompanied by proof of defect via either physical return of the defective garment or electronic images in order for us to most effectively determine the cause of the defect. Once a garment is determined to be defective, we will either replace or repair the garment. In the event of a replacement we may require that the item is returned to our facility.

Proper Use
 To ensure a correct fit, try on a garment prior to washing or service. Garment should be loose fitting, nonrestrictive of movement, and interface properly with other equipment so that full coverage is maintained. Apply garment to body and secure all fastening systems such as zippers, snaps, buttons and hook and loop.

Maintenance, Cleaning and Repair
 Secure all fastening systems and turn garments inside out prior to washing. Machine wash garment with heavy duty detergent in hot water (140° F/60° C). Do not use Chlorine bleach or detergents containing chlorine bleach as they will deteriorate the protective properties of the fabric. Tumble dry garment on low heat. Do not line-dry in sunlight. After cleaning, garment should be inspected for any thread breaks, ruptured seams, fabric tears, thermal damage, missing hardware and mal-functioning closure systems. Any repairs made must use recognized components. Garment should be thoroughly cleaned, dried and inspected before and after each service. Garment should be stored in a dry place away from direct sunlight. Garments that have been exposed to chemical or biological contamination should be sealed in an airtight and moisture proof bag to prevent the spread of contaminants to other support personnel and equipment.
