For Neck, Shoulders, Hip

Cervical/Neck Wrap
#61065 (61060)
For Neck & Shoulders
Velcro® closures.

PROTOCOLD®

Reusable Cold Therapy Wraps & Pads

Cold therapy that complies with medically accepted protocols.

Immediate Pain Relief

Protocold Pads remain soft and flexible and may be applied directly to the site of pain for immediate pain relief. The unique pad design assures complete conformance with no bunching, saddle-bagging, splitting or "bottoming out".

Clean

Protocold Pads are condensation-free and will remain dry during treatment. The pad material is non-absorbent and may be cleaned and disinfected.

Safe

Protocold Pads are designed to deliver timed-release cold. This prevents "rebound effect" and tissue damage if pad remains in place past doctor recommended treatment time. Pads are latex-free, non-toxic and environmentally friendly.

Easy to Use

Protocold Pads are the perfect thickness and weight to allow easy application and full freedom of movement during treatment. Cold therapy is delivered at temperatures that comply with medically accepted protocols.

Value

Protocold Pads feature two layers with double-seal construction. Patent pending design prevents pads from bursting or leaking. No special covers are required.
