

Paging Horns

Valcom's High-Efficiency Horns are equipped with either a 5 or 15-watt amplifier to generate the right amount of sound for an environment's ambient noise level. Valcom's horns are easily mounted and include an I-beam mounting option for non-traditional locations. They are weather-resistant for indoor/outdoor applications and are ideal for industrial plants, warehouses, parking lots, stadiums, schools, transportation terminals, parks and recreational areas.

Features & Advantages

Weather-Resistant

Able to withstand harsh elements.

Built-In Amplifier

Excellent sound quality, low power consumption.

Built-In Volume Control

Allows for comfortable volume levels.
