# Avaya Equinox™ Experience: Team Collaboration Integration

## Unified Communications and Team Collaboration in One App

A true unified communications (UC) experience is what the Avaya Equinox Experience is all about. With its “mobile-first” Top of Mind screen, the Avaya Equinox solution provides at-a-glance visibility to meetings, instant messaging and call history, giving users a single place to keep themselves up to date and productive regardless of where their day may take them.

That same true UC experience is now extended with the integration of cloud-based team collaboration. Avaya Equinox now enables users to achieve the full benefits of a team work environment that integrates voice, video, persistent team chat and messaging, along with file and screen sharing, all from within the Avaya Equinox Experience.

### Highly Effective and Persistent Team Collaboration

The Avaya Equinox solution makes collaborating with team members inside or outside your organization easier than ever before. Whether you’re on your PC or Mac at work, your tablet at home, or on your mobile phone any place in between, Avaya Equinox gives you the tools to engage your team members, drive productivity and faster decision making, and share information that will help bring your team activities to a successful conclusion. Now Avaya Equinox enables teams to easily and persistently connect and share content via any communications channel—chat, voice, video, and web conferencing.

A complete and integrated team collaboration and unified communications solution:

- Persistent Team Chat and One-to-One Instant Messaging
- File Sharing
- Audio and Video Meetings with Screen Sharing
- Calendar Integration
- Task Administration
- Enterprise-Grade Voice, Video and Applications

Avaya Equinox provides one-on-one instant messaging for those quick questions and issues that don't need the entire team, as well as cross-team chat for items that do. With their rich, multimedia capabilities these messaging solutions allow the addition of virtually any kind of file including audio, video, photos and diagrams. And persistent chat means that team members can catch up on progress while working across time zones or when team members are off line with travel or other activities.

A permanent repository for file sharing is a critical team management tool that helps everyone stay up to date and contribute their expertise. Avaya Equinox now embeds file sharing into each space for quick access to the documents your team needs. When a project deadline is required, Avaya Equinox has you covered with its integrated task assignment engine. Team members can easily create, see and respond to task assignments, monitor progress and learn when tasks are done.

When it's time for the team to start some face-to-face collaboration, Avaya Equinox provides complete meeting capabilities including audio and video conferencing with screen sharing. Whether separated by a few floors or many miles, Avaya Equinox conferencing provides team members with the opportunity for personal interaction, enabling them to see content and collaborate in real time.

## Easy-to-Manage, Easy-to-Use

In the Avaya Equinox Experience, anyone can create and manage a team space. Just as important, users can quickly and easily set the preferences that keep them "in the loop" without receiving overwhelming notifications. Multiple spaces can be established, one for each project or team, using the fast, intuitive interface. Within each space, the team roster presence lets you see who is on or off line. With the easy-to-use Avaya Equinox Experience, you'll find your people self-organizing around key tasks, helping to drive productivity across your organization.

#### **BENEFITS:**

- Single, Enterprise-Grade Solution Simplifies User Experience and Administration
- Easy-to-Use Intuitive Interface
- Easily Reach Team Members Outside Your Organization
- Cost-Effective and Flexible Tiers Based on Individual Needs

### **Enterprise-Grade**

For the enterprise, security is always a concern. Your employees may already be using a consumer-based messaging solution, but it may fail to meet your corporate guidelines or regulations. Avaya Equinox goes beyond the capabilities of those consumer solutions, providing access to enterprise grade voice, video and file sharing while giving IT the confidence that application usage is more secure and controlled.

### **Accessible to Everyone**

Setting up meetings and inviting members is a snap. With team collaboration capabilities in the cloud, Avaya Equinox breaks down enterprise walls and lets external members fully participate too. This makes engaging nearly any resource as easy as adding their email address to the team space and sending an invitation. Integrations with Microsoft Outlook and Google Calendar allow users to add meeting details to an invitation with a single click. Avaya Equinox is great for ad-hoc meetings too; sending a “Can you meet me now?” instant message is all it takes. Just as in scheduled meetings, access to the complete set of conferencing capabilities is available in ad-hoc meetings as well.

### **Cloud Team Collaboration is Included with Avaya Equinox Solution**

If that sounds like a valuable set of capabilities, then you’ll be amazed to learn that Avaya Equinox basic team collaboration is free! Basic includes team space creation and management, web and mobile app access, room chat, one-to-one instant messaging and video calling, file sharing

# Integrate Your Team Collaboration into a Single, Intuitive, Secure and Enterprise-Grade Unified Communications Platform.

## About Avaya
