

PRICE GUIDE

Compiled by market expert Russ Smith

Estimated values, build dates, engine capacities, 0-60mph times, fuel consumption figures and parts availability - the PC Price Guide is updated every four weeks

Prices in this guide are researched from several sources, including clubs, auctions, the trade and advertisements online and in print. These prices are reviewed and updated every issue. Our C/D rating is a basic guide to what you can expect to pay (£) for

the best examples of a model, a concours car or something from a dealer. **CONDITION 1** means well-presented cars that have no obvious faults. **CONDITION 2** cars are capable of regular use. They have a current MoT certificate but will need

work and/or original parts. **CONDITION 3** cars usually need a complete rebuild, but might be driveable and MoT'd - candidates for restorations. **PLEASE NOTE** You cannot accurately value any car without seeing it in the flesh. Don't buy blind.
