

*We are looking for that tech savvy project engineer
with two right hands.*

Full time - Delft

PHYSEE

At PHYSEE we have a thorough belief in sustainable innovation without compromise. Innovation which brings added value for our customers, without compromising on aesthetics, technology or costs. Holding on to this belief has led us to design and produce the world's first fully transparent, energy and data generating windows; PowerWindow and SmartWindow.

Since we focus on building a better future we are determined to expand our young and ambitious team with new people who would like to be part of the next phase of growth of PHYSEE.

The job

Since PHYSEE is gaining popularity, the deployment of our technology in commercial and residential real-estate rapidly increases. The department of Operations (Projects & Processes) is expanding and looks for a versatile project engineer to join its team.

In this department and as a project engineer you are the link between the Product Development and the Business Development department. Besides maintaining an excellent relationship with the external project's stakeholders, it is of utmost importance to stay closely connected to these teams internally.

We need someone who can take complete accountability for **projects**, combining a skillset of **planning and preparation** as well as **knowledge on production and installation**. We are looking for someone with experience working in **construction**, preferably with a **background in electronics**.

Do you **operate** like a well-oiled machine? Do you **work by the book**, create **order** and ensure that your work and the work of those around you is completed to the **highest standards**? Find out if our mission can be your mission.

Your mission

- You are responsible for a project in the stages between sale and after-sale.
 - This entails drawing, planning, ordering, (instructing) installation and logistics
- You can manage multiple projects simultaneously.
- Your structured workflow ensures the projects to run on-schedule.
- You are able to oversee projects small and big (ranging from 10 to 10.000m²) and plan accordingly, making a clear distinction between essentials and details.
- You are a great networker and enjoy connecting with others to get things done.
- You enjoy switching working behind a desk and on construction sites and are able to regularly switch functions.
- You are tech savvy and enjoy making your hands dirty.
- Your positive and creative mindset will inspire the team!

Requirements

- A degree in a technical oriented education, that entails (but is not limited to):
 - Project management, work planning and supervision
- Familiarity with ERP and intermediate CAD (AutoCAD/Revit) skills
- Required working experience: minimum of 3 years, experience in construction
- Excellent spoken and written Dutch and English

Don't apply for the job if you do not want:

- To be part of the 30 most promising tech pioneers worldwide and most promising start-up in the Netherlands (according to World Economic Forum)
- To work the winners of 2016's Green Challenge
- To join a young, ambitious team full of mad scientists and creatives
- To work in the coolest building of Delft (read: rooftop terrace)
- To change this world and our perspective on it

Do you think you're capable for the job and are you the perfect team member? Let us know you and send an email to Noortje at jobs@physee.eu.

Looking forward seeing you!
