## Instructions for Use
(Hospital/Professional version)

LATEX FREE/DEHP FREE/BPA FREE
PATENT PENDING

TurtleTub is approved for use as follows:

1. **TurtleTub is a single-infant-use-only product.**
2. **TurtleTub may be re-used on multiple patients only when used with TurtleTub disposable bath liners and when our multi-patient cleaning instructions are followed.**
TurtleTub™ Indications for Use:
Intended for infant swaddle bathing. May also be used for immersion tub bathing.
For use on infants from preterm to 3 months corrected age.

TurtleTub Instructions For Use:
1. Inspect the tub prior to use and discontinue the use of the product if it becomes damaged, broken or disassembled.
2. Encourage parents to bathe infant.
3. Clean TurtleTub prior to use – refer to steps 26 and 27.
4. Modify environment as needed to decrease draft and sensory stimuli.
5. Arrange TurtleTub contents for use.
6. For Single-Patient use: Write infant name on label (on side of tub).
7. For Multiple-patient use: Place TurtleTub bath liner in the tub.
8. Undress infant.
9. If infant has leads, unplug them. The sticky gel portion of the lead can remain on infant. They are easier to remove when wet.
10. Position infant with hands near face and swaddle in fleece blanket.
11. Fill TurtleTub with water until temperature is 101°F-103°F (38°C-39°C). Test the water with your hand in addition to using the temperature strip. Water height should be to infant chest. If using a liner, ensure the liner is smooth (no wrinkles) on the temperature strip.
12. Fill rinse cup with water and place in tub as shown in Figure 1.

Drowning Hazard: Babies have drowned while using infant bath tubs.
To prevent drowning:
- Stay in arm's reach of your baby.
- Never rely on a toddler or preschooler to help your baby or alert you to trouble. Babies have drowned even with other children in or near bath tub.
- Babies can drown in as little as 1 inch of water. Use as little water as possible to bathe your baby.
- Use tub only on sturdy non-slip surface, in an empty sink, or in an empty adult bathtub.
- Keep drain open in adult tub or sink.

Fall Hazard: Babies have suffered head injuries falling from infant bath tubs.
To prevent falls:
- Place tub only on sturdy non-slip surface, in an empty sink, or in an empty adult bathtub.
- Never lift or carry baby in tub.

Figure 1

13. Place swaddled infant in tub. Keep bath time as short as possible (7-10 minutes).
14. Use clean 4x4 washcloths without cleanser to wash baby’s face. Wash one eye at a time moving from inside corner of eye outward. Use clean section of cloth on each eye. Clean outer ear only. Wash face, neck and behind ears.
15. Gently unswaddle one arm and use cleanser on your gloved hands to wash infant. Parents can use ungloved hands for bathing. Use a firm, but gentle touch. Rinse and re-swaddle. Repeat with all extremities and chest. If infant has chest leads, remove them. Remember to keep infant swaddled throughout the bath.
16. Gently roll infant to side-lying and clean the infant's back by rubbing on the fleece. Reposition infant to supine.
17. Wash genital area with a 4x4 washcloth and cleanser.
18. Check temperature and add warm water as needed.
19. Wash infant’s head last to conserve heat. Use the scalp brush provided and apply enough pressure to bend the bristles. Use water from the clean rinse cup to rinse the baby’s head.
20. Stand close to the tub with a warm, drying blanket (hospital supplied) secured under your arms.
21. Unswaddle infant and lift infant out of tub and into the warm, hospital blanket. Pat dry making sure infant’s head is dry.
22. Place infant in the bed on another warm hospital blanket and wrap infant.
23. Take axillary temperature.
24. Place new leads on infant, if needed.
25. Prepare infant for skin-to-skin holding or feeding. Or dress and position infant for sleep.
26. Cleaning for Single-patient use: Use the pour spout to empty the water from the tub. Wash the TurtleTub with gentle soap and water and dry.
27. Cleaning for Multiple-patient use: Use the pour spout to empty the water from the tub. Discard the TurtleTub liner. Wipe the TurtleTub with a hospital approved alcohol-based wipe such as PDI Sani-Cloth Super (Purple Top) wipes.
28. Wash fleece blanket per hospital protocol for infant wear.
29. Store Tub by hanging in a TurtleTub mesh storage bag (TT1108) or cover the tub with an infant blanket to keep clean between uses.

WARNING:

Drowning Hazard:
Babies have drowned while using infant bath tubs.
To prevent drowning:
- Stay in arm's reach of your baby.
- Never rely on a toddler or preschooler to help your baby or alert you to trouble. Babies have drowned even with other children in or near bath tub.
- Babies can drown in as little as 1 inch of water. Use as little water as possible to bathe your baby.
- Use tub only on sturdy non-slip surface, in an empty sink, or in an empty adult bathtub.
- Keep drain open in adult tub or sink.

Fall Hazard: Babies have suffered head injuries falling from infant bath tubs.
To prevent falls:
- Place tub only on sturdy non-slip surface, in an empty sink, or in an empty adult bathtub.
- Never lift or carry baby in tub.
