

2 1/8" Insulated Door

Benefit from our innovative thinking and design providing PVC truck doors that are the perfect balance between strength and flexibility. North American made superior quality since 1999.

Profit from superior doors:

- PVC panels with zinc coated hinges
- Clean design
- Light weight
- Water tight
- Save money!

Industry leading 2 1/8" insulated door features.

Panels

- Redesigned 12" x 2.125" panels are designed with weather barrier.
Patent pending no.15420251.
- Designed to drop in to most standard external hinged designs.
- Durable and light weight, extruded structural PVC provides an estimated savings of \$200 to \$800 in fuel costs during the life of the door.
- Our PVC design never requires painting and won't show scratches like most conventional doors.
- Zinc plated hinge for extended hinge life with optional SS upgrade available.
- Provide superior protection against water and dirt penetration.
- Special additive provides superior protection against UV damage and chemical corrosion.
- Hygienic design with an industry leading 5 year warranty against fading and delamination.

Insulation

- Roador™ uses 94% closed cell eco-foam rated at a 7.5 R-value per inch.
- Ends are sealed with a rubberized sealant to help prevent water absorption that is common to most door models.

Top Bracket Assembly

- Our low headroom galvanized steel top bracket and SS mounting plate is designed for fast and easy adjustment.

Counterbalance

- Single and dual spring galvanized operator assembly available.

Reinforcement

- Aluminum flat bar and angle support hinges and throughout the door to maximize strength without sacrificing our light weight design.

Bottom panel

- Standard with an aluminum bottom seal retainer.
- PVC bottom seal with dual leg and dual center rubber bumper to reduce closer impact shock.
- NEW through U-bolts allow easy access in hidden cable design.
- OPTIONAL Bottom swing hinge allows the bottom panel to stay out of harms way in the header of the door

Rollers

- Nylon roller with five inch stainless steel shank provides a rust free and stronger roller that requires no greasing. Our rollers are rated for 100,000 cycles.

Seals

- Dual flexible rubber seal ensure good seal contact, even on older frames. If header frame is distorted, we also offer an optional header seal to increase your contact range up to 2".
