

**Corinne LEPRINCE****Date of Birth** : December 23th, 1962**Nationality** : French**Personal address** :9 Clos des Melodies  
31470 Fontenilles  
France**Professional address** :UDEAR/UMR1056 INSERM  
Hopital Purpan  
Place du Dr Baylac TSA 40031  
31059 Toulouse cedex 09 France

Mobile : +33686423458

Tel : +33561158428

E-mail : [Corinne.Leprince@gmail.com](mailto:Corinne.Leprince@gmail.com)E-mail: [Corinne.Leprince@inserm.fr](mailto:Corinne.Leprince@inserm.fr)**ACADEMIC RECORD****1988 : PhD in Immunology** at the « Université Pierre et Marie Curie, Paris VI », France.**1989-1991 : Post-doctoral** training in Pr E. A. Clark's laboratory at the University of Washington, Seattle, USA.**WORK EXPERIENCE****1984-1989:** INSERM U131 "Immunopathology and Viral Immunology" laboratory directed by Pr P. Galanaud, Clamart, France. *PhD student. Research theme: "Human B lymphocyte activation and membrane markers"***1989-1991:** Pr E. A. Clark's laboratory, Dept of Microbiology and Immunology, University of Washington, Seattle, USA. *Post-Doctoral fellow. Research theme: "Signaling pathways related to the B cell receptor for antigen (BCR)"***1991: Recruited as Research Scientist at the INSERM ("National Institute for Health and Medical Research", France)****1992-1994:** INSERM U131 "Immunopathology and Viral Immunology" laboratory directed by Pr P. Galanaud, Clamart, France. *INSERM Research Scientist. Theme: "Role of the CD22 molecule in the BCR signalling"***1995-2005:** INSERM U248, then 528 "Intracellular Signalling and Oncogenesis" laboratory directed by Pr A. Tavitian and Dr J. de Gunzburg, Institut Curie, France. *INSERM Research Scientist. Theme: "Amphiphysin 2, a crossroad of intracellular signalling and vesicular trafficking"*.**2006-2010:** LBCMCP/CNRS UMR 5088 "Molecular and Cellular Biology of Cell Growth Control" laboratory directed by Pr B. Ducommun, Université de Toulouse, France. *INSERM Research Scientist and co-director of a research group. Theme: "Membrane dynamics of cell division"*.**2011 to Present:** UDEAR/ INSERM U1056 "Epidermal Differentiation and Rheumatoid Autoimmunity" laboratory directed by Pr G. Serre, Toulouse, France. *INSERM Research Scientist. Theme: "Role of intracellular trafficking in the epidermal barrier"*.**ADDITIONAL INFORMATION****Responsibilities:** Supervisor of 8 Master students and 1 PhD studentReview expert for the following journals: *Journal of Investigative dermatology, Plos One.***Member of Scholarly Societies:** "French Society of Cell Biology"; "French Society of Dermatologic Research"; "European Society of Dermatologic research"**Publications:** 30 publications referenced in PubMed (892 citations in the Web of science; h-index = 15)**Scientific interests** (keywords): Dermatology, Epidermal barrier, Cell biology, Trafficking, GTPases.

## SELECTED PUBLICATIONS

- 2016:** Reynier M, Allart S, Gaspard E, Moga A, Goudounèche D, Serre G, Simon M, Leprince C. 2016. Rab11a Is Essential for Lamellar Body Biogenesis in the Human Epidermis. *J Invest Dermatol.* 136(6):1199-209.
- 2015 :** Le Lamer M, Pellerin L, Reynier M, Cau L, Pendaries V, Leprince C, Méchin MC, Serre G, Paul C, Simon M. 2015. Defects of corneocyte structural proteins and epidermal barrier in atopic dermatitis. *Biol Chem.* 396(11):1163-79.
- 2014:** Andrieu G, Quaranta M, Leprince C, Cuvillier O and A Hatzoglou. 2014. Gem GTPase acts upstream Gmp/RhoA to regulate cortical actin remodeling and spindle positioning during early mitosis. *Carcinogenesis.* 35(11):2503-11.
- 2012:** Andrieu G, Quaranta M, Leprince C\*, and A Hatzoglou\*. 2012. The GTPase Gem and its partner Kif9 are required for chromosome alignment, spindle length control, and mitotic progression. *FASEB J.* 26(12):5025-34. \* *Equal contribution*
- 2009:** Meunier B, Quaranta M, Daviet L, Hatzoglou A and C Leprince. 2009. The membrane-tubulating potential of amphiphysin 2/BIN1 is dependent on the microtubule-binding cytoplasmic linker protein 170 (CLIP-170). *Eur J Cell Biol.* 88(2):91-102.
- 2004:** Mouhamad S, Besnault L, Auffredou MT, Leprince C, Bourgeade MF, Leca G and A Vazquez. 2004. B cell receptor-mediated apoptosis of human lymphocytes is associated with a new regulatory pathway of Bim isoform expression. *J Immunol.* 172(4):2084-91.
- 2003 :** Leprince C, Le Scolan E, Meunier B, Fraissier V, Brandon N, De Gunzburg J, and JH Camonis. 2003. Sorting nexin 4 and amphiphysin 2, a new partnership between endocytosis and intracellular trafficking. *J Cell Sci.* 116:1937-48.
- 2000:** Jullien-Flores V, Mahé Y, Mirey G, Leprince C, Meunier-Bisceuil B, Sorkin A, and JH Camonis. 2000. RLIP76, an effector of the GTPase Ral, interacts with the AP2 complex: involvement of the Ral pathway in receptor endocytosis. *J Cell Sci.* 113:2837-44.
- 1999:** Cussac D, Vidal M, Leprince C, Liu WQ, Cornille F, Tiraboschi G, Roques BP, and C Garbay. 1999. A Sos-derived peptidimer blocks the Ras signaling pathway by binding both Grb2 SH3 domains and displays antiproliferative activity. *FASEB J.* 13(1):31-8.
- 1997:** Leprince C, Romero F, Cussac D, Vayssiere B, Berger R, Tavitian A, and JH Camonis. 1997. A new member of the amphiphysin family connecting endocytosis and signal transduction pathways. *J Biol Chem.* 272(24):15101-5.
- 1995:** Chaouchi N, Vazquez A, Galanaud P, and C Leprince. 1995. B cell antigen receptor-mediated apoptosis. Importance of accessory molecules CD19 and CD22, and of surface IgM cross-linking. *J Immunol.* 154(7):3096-104.
- 1993:** Leprince C, Draves KE, Geahlen RL, Ledbetter JA, and EA Clark. 1993. CD22 associates with the human surface IgM-B-cell antigen receptor complex. *Proc Natl Acad Sci U S A.* 90(8):3236-40.
- 1992:** Leprince C, Draves KE, Ledbetter JA, Torres RM, and EA Clark. 1992. Characterization of molecular components associated with surface immunoglobulin M in human B lymphocytes: presence of tyrosine and serine/threonine protein kinases. *Eur J Immunol.* 22(8):2093-9.
