

The READ:IT program is designed to answer the following questions:

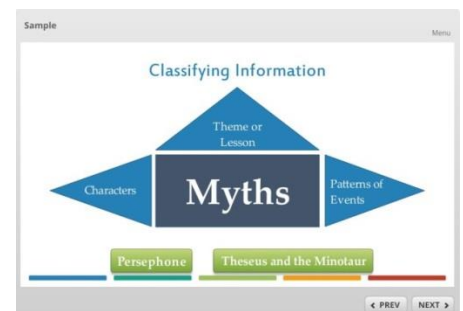

1. How can I improve my child's spelling?
2. Why does my child skip words while reading?
3. Why doesn't my child sound out words? He seems to be guessing at them.
4. Why can't my child sit still and pay attention?
5. Why doesn't my child like to read?
6. How can I advance my child's comprehension skills?

## What is READ:IT?

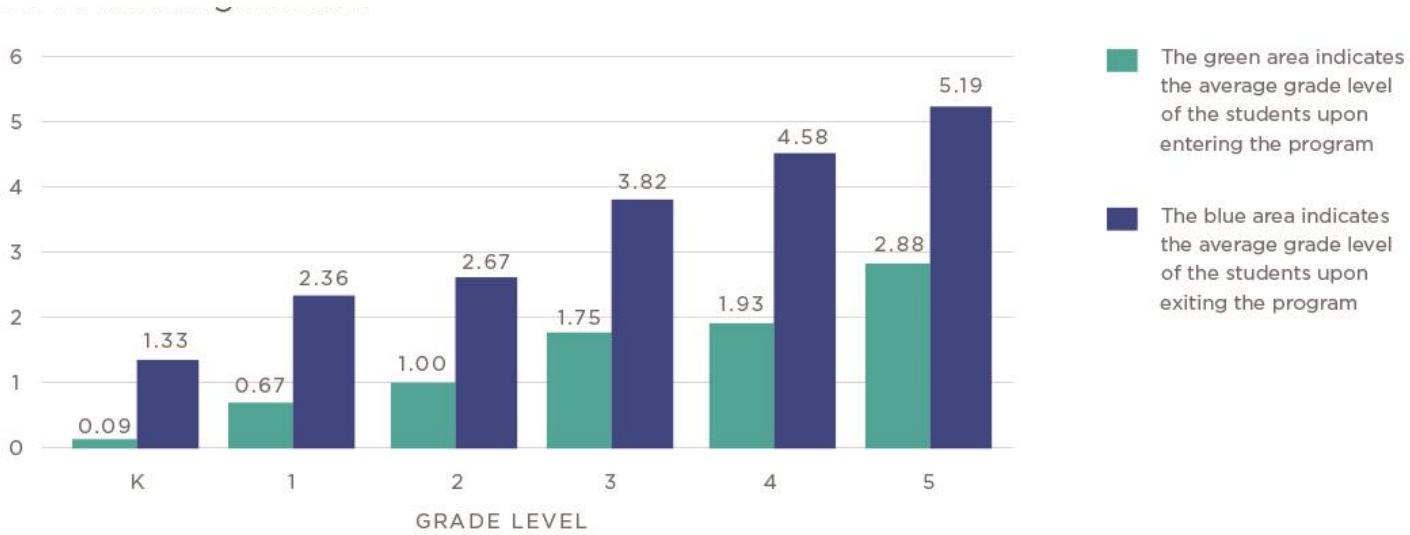

READ:IT is a fully comprehensive reading and spelling program that is designed for **ALL** students. It is highly engaging, and rooted in the fundamentals of reading.

If your child struggles, he/she will be assessed to find out the root cause as to why reading and/or spelling isn't being performed at grade level. Once this assessment is made, your child will be guided through a very specific set of plans that includes phonics, spelling, vocabulary, comprehension and fluency activities. If your child is advanced, he/she will be challenged to critically think, ask questions and dive deeper into literary genres and origins of words.

# How is this program different?

**READ:IT is highly engaging and multi-sensory.** This means that it is very hands-on and fun! Unlike other programs, your child won't be working on skills that are not pertinent to him/her, but rather skills that meet individual needs.
