

Entrepreneurship and Leadership Workshop

February 24, 2017, 9:30-4:00pm

Medical Science Building, Room 4171

University of Toronto, St. George Campus, 1 King's College Cir, Toronto, ON

This one-day workshop provides attendees with insight and information about planning and financing a new company, specifically in the drone / UAV / aerial robot industry, but with ideas and concepts that apply to any technology start-up. Speakers range from entrepreneurs in the early stage of operating their companies to principals of major corporations to internationally successful investors.
