Klaus Lutz (1940–2009) realized his Weltbild, image or concept of the world, as did the Roman god Vulcan, forging from within, a universe, a shield upon which a cosmology of his own invention shone.

Klaus Lutz's 16-millimeter films and graphic works, along with Frank Matter's documentary film *The Beauty of My Island—Shooting Klaus Lutz* will be on view at Aalto University's beta Space from August 18–October 13, 2017.
