FOOD SCRAP DROP OFF HUB GUIDELINES:

DO NOT LEAVE PLASTIC BAGS OR OTHER MATERIAL OUTSIDE THE BINS

Anything left outside the bins is considered litter. Bags should be taken home and disposed of properly. When possible, use a brown paper bag or a reusable container to collect your food scraps. Every paid member should have the code to access the bins. If a lock becomes stuck, try the next one. If you are still unable to get into the bins please contact us as soon as possible at info@aquidneckcommunitytable.org.

FILL BINS TO THE LEFT FIRST

When one yellow bin is filled to the brim with food scraps, please move on to the next available empty bin to the right. We are charged by the bin no matter how full it is. Pull the active bin out from the others slightly to indicate to the next person dropping off that it is available.

REMOVE PLU STICKERS FROM FRUIT

Stickers are cute, but not on your fruit! The stickers you find on fruit purchased at grocery stores (bananas, clementines, oranges, apples, avocados, etc) take a very long time to decompose. If they are not removed from the skains and peels before being tossed into the food scrap bin, they will end up in the finished compost.

RECRUIT A FRIEND!

Tell a friend about our program and why you think it is a good idea to compost. Also, feel free to share a photo and helpful tip with us and we will post it on Instagram or Facebook to help encourage others to get involved.

CHECK YOUR EMAIL

We will occasionally provide updates via email including changes to the code to access the bins.
TIPS FOR A TIDY BUCKET:

PLACE PLU STICKERS ON BUCKET LID

FREEZE YOUR FOOD SCRAPS

USE SAWDUST, WOOD CHIPS, OR A BROWN PAPER BAG TO LINE YOUR BUCKET

DROP OFF SCRAPs ONLY

RINSE BUCKET WITH DILUTED VINEGAR

THE COMPOST PLANT
