RESEARCH INTERESTS

High-energy theoretical physics (phenomenology): dark matter, supersymmetry, unconventional strategies for dark matter detection, MeV-scale dark forces

POSITIONS

Postdoctoral research associate
Princeton University
Princeton, NJ USA

September 2015 - present

Current research:

- New experimental design (ABRACADABRA) for detection of ultralight axion dark matter.
- Low-threshold and directional keV-MeV dark matter detection with graphene and Weyl semimetals.
- Phenomenology of new light weakly-coupled gauge forces. Supervised graduate student Siddharth Mishra-Sharma on surveying the parameter space for UV-complete models of MeV-scale abelian dark forces with axial couplings.
- Using neutrino experiments to search for MeV dark photons and dark matter. Supervised graduate student Matthew Moschella on reanalysis of LSND data set for inelastic dark matter.

EDUCATION

Massachusetts Institute of Technology
Cambridge, MA USA

September 2010 - June 2015

Ph.D, physics, June 2015

- Thesis title: *Forces and Gauge Groups Beyond the Standard Model*
- Advisor: Jesse Thaler
- Thesis committee: Jesse Thaler, Allan Adams, Christoph Paus

University of Cambridge
Cambridge, UK

October 2009 - June 2010

Certificate of Advanced Study in Mathematics, June 2010

- Completed Part III of the Mathematical Tripos in Applied Mathematics and Theoretical Physics
- Essay topic: *From Topological Strings to Matrix Models*

Northwestern University
Evanston, IL USA

September 2004 - June 2009

B.A., physics and mathematics, June 2009

- Senior thesis: *Models of Dark Matter and the INTEGRAL 511 keV line*
- Senior thesis advisor: Tim Tait

B.Mus., horn performance, June 2009

HONORS AND
AWARDS

APS J.J. and Noriko Sakurai Dissertation Award in Theoretical Particle Physics	2016
Andrew M. Lockett III Memorial Fund Award for graduate research	2014
National Science Foundation Graduate Research Fellowship	2011-2014 (awarded 2010)
University of Cambridge: graduated with Distinction (highest honors in the Part III program)	2010
Churchill Scholarship for study at the University of Cambridge	2009
Northwestern University	2009
• Summa cum laude in physics and mathematics	
• Departmental honors and Outstanding Senior Thesis in physics	
• Phi Beta Kappa Centennial Prize for highest overall GPA	
• Phi Beta Kappa	
Josephine de Kármán Fellowship	2008
Barry M. Goldwater Scholarship	2007

SEMINARS

SLAC	February 2017
Weizmann/Tel Aviv University/Technion joint HEP seminar	January 2017
UT Austin	December 2016
Brown University	December 2016
Perimeter Institute	November 2016
Cornell University	September 2016
Harvard University	September 2016
Fermilab	April 2016
Argonne National Lab	April 2016
UC Irvine	April 2016
University of Oregon	April 2016
YITP, Stony Brook University	April 2016
MITP, University of Michigan	March 2016
CCPP, New York University	February 2016

	SITP, Stanford University	February 2016
	MIT-Tufts Joint Cosmology Seminar	December 2015
	University of Minnesota	October 2015
	Perimeter Institute	December 2014
	Princeton University	November 2014
	University of Washington	January 2014
WORKSHOPS	<i>The LHC Awakens: A New Energy Frontier</i> , Aspen Center for Physics	Aug-Sept 2016
	<i>Precision for New Discoveries</i> , TRIUMF	June 2016
	<i>Dark Sectors Workshop 2016</i> , SLAC	April 2016
	<i>Pre-SUSY Summer School</i> , University of Manchester	July 2014
	<i>Theoretical Advanced Studies Institute (TASI)</i> , CU Boulder	June 2013
INVITED TALKS	<i>2nd Workshop on Microwave Cavities and Detectors for Axion Research</i> , LLNL	January 2017
	<i>Symmetry Tests in Nuclei and Atoms</i> , UC Santa Barbara	September 2016
	<i>American Physical Society April Meeting 2016</i> , Salt Lake City	April 2016
CONFERENCE PRESENTATIONS	<i>Interplay of Particle and Astrophysics (IPA) 2014</i> , Queen Mary's University	August 2014
	<i>SUSY 2014</i> , University of Manchester	July 2014
	<i>Physics of Electron Beams</i> , MIT	March 2013
	<i>Spin Structure at Long Distance</i> , Jefferson Lab	March 2009
TEACHING	Co-author , " <i>Conquering the Physics GRE</i> " (with Adam Anderson) A reference to help undergraduate students prepare for the Physics GRE. Revised Third Edition to be published by Cambridge University Press.	
	Physics GRE Instructor, APS Bridge Program Developed and taught an 8-week Physics GRE prep course for students enrolled in the APS Bridge Program, a program designed to help minority physics students gain acceptance to graduate physics programs.	July 2014-August 2015
	Teaching assistant, MIT	September 2010-May 2015
	<ul style="list-style-type: none"> • 8.276 Nuclear and Particle Physics, Spring 2015 (guest lecturer) • 8.324 Relativistic Quantum Field Theory II, Fall 2014 (full-time TA) • 8.952 Particle Physics of the Early Universe, Spring 2014 (10% TA, sole grader) • 8.831J Supersymmetric Quantum Field Theories, Fall 2013 (guest lecturer) • 8.851 Effective Field Theory, Spring 2013 (10% TA, sole grader) 	

- 18.395 Group Theory with Applications to Physics, Fall 2012 (10% TA, sole grader, wrote all problem set solutions)
- 8.962 General Relativity, Spring 2011 (10% TA, shared grading responsibilities)
- 18.395 Group Theory with Applications to Physics, Fall 2010 (10% TA, sole grader, wrote all problem set solutions, gave last three lectures)

Full-time instructor, MITES Calculus II

June - July 2011

Taught 6-week single-variable calculus course, covering single-variable integral calculus and basic differential equations, for Minority Introduction to Engineering and Science (MITES) program at MIT. Wrote all lectures, problem sets, and exams, lectured 4.5 hours/week, gave office hours 2 hours/week.

SERVICE

Co-organizer, *Developing New Tools for Dark Matter Searches*, Aspen **August-September 2017**

Co-organizer, *Workshop on non-WIMP dark matter*, PCTS **November 2016**

Organizer, Princeton “Pheno & Vino” seminar **September 2016 - present**

Referee, *Physical Review Letters* **July 2015 - present**

Referee, *Physical Review D* **November 2013 - present**

Co-organizer, MIT beyond-the-Standard-Model journal club **2014 - 2015**

Co-organizer, MIT CTP graduate student lunch seminar **2012 - 2013**

EDUCATIONAL
OUTREACH

Part-time instructor and grader, Art of Problem Solving, Inc. June 2009 - June 2012

Alpine, CA USA

Taught and graded problem sets for web-based mathematics classes for advanced middle and high school students.

- Instructor: Precalculus (2011-2012), MATHCOUNTS Basics (Summer 2011)
- Assistant: Group Theory (Winter-Spring 2011)

MIT+K12 Initiative

June - August 2011

Made educational videos on physics topics:

- Doppler Effect: <http://k12videos.mit.edu/browse-videos/2014/4/17/the-doppler-effect>
- Poisson Spot: <http://video.mit.edu/watch/light-in-the-shadows-the-poisson-spot-8418/>
- The Shape of Sound: <http://video.mit.edu/watch/the-shape-of-sound-12958/>

COMPUTER SKILLS

- Languages: C++, Python, some Linux and Unix, some Fortran
- Analysis software: Mathematica, ROOT
- Event generator simulations: MadGraph
- Operating Systems: Unix/Linux, Mac, Windows

LANGUAGES

- English (read, spoken, written)
- French (read, spoken, written)
