

**GREEN GODDESS**

This lipstick/balm goes on clear with a greeny tint, but quickly turns the perfect just-kissed shade of soft berry. It works with the pH of your lips to create a colour that is unique to you – essentially, it is your lips, only better.

**Lipstick Queen Frog Prince**, £22, from Space NK

**ALL-ROUND WINNER**

Place the spherical brush at the root of your hair and twist as you dry – the more you twist, the more waves you can put into your hair. Perfect for creating that fashionable Kate Moss/Georgia May Jagger (left), unruly bed-head wave. Simply leave to cool twisted, then drag your fingers through to loosen the waves, or brush for a more groomed effect.

**Mark Hill WonderBall Brush**, £9.99, from Boots

**BEAUTY**

**BEAUTY INSIDER**

*Sometimes a beauty product comes along that changes the way we think about our beauty routine. Welcome to the glamour revolutionaries...*

**Clarins Radiance-Plus Golden Glow Booster for Body**, £26; visit clarins.co.uk

**LASH EXTENSION**

How clever is this? A clear serum/gel/cream hybrid that when applied to clogging and clumpy lashes helps to smooth them out. What's more, I've discovered that it can give extra fluidity and life to drying-out mascara, too. Simply load and dip the brush into your mascara tube, wiggle it around and then use your mascara as usual.

**BROWNIE POINTS**

Last summer, Clarins made customised facial tanning a breeze with its Radiance-Plus Golden Glow Booster, a concentrate of active tanning ingredients that can be added to your favourite facial moisturiser, serum or oil. Now there is a version for your body. Just four to six drops, mixed with your everyday moisturiser, oil or serum in the palm of your hand, should give you the perfect blend for a golden glow.

**Urban Decay Mascara Resurrection**, £10, from John Lewis

**Lancôme Miracle Cushion**, £29.50, in five shades

**CUSHION THE GLOW**

Cushions will play a major part in make-up routine this spring. Leading the way is Lancôme with Miracle Cushion, a clever liquid foundation contained in a cushiony sponge. Press the pad into the cushion then pat lightly onto skin for a lightweight finish, or harder for heavier coverage. Gives a nice soft-focus, semi-matte finish.
