

Notice of Connecticut Siting Council Application to be Submitted

Notice is hereby given, pursuant to Section 16-50|(b) of the Connecticut General Statutes and Regulations pertaining thereto, of an Application to be submitted to the Connecticut Siting Council (“Council”) on or about August 17, 2016 by NTE Connecticut, LLC (“NTE” or the “Applicant”). NTE is proposing to develop the Killingly Energy Center (“KEC”), an approximately 550 Mega Watt (“MW”) air-cooled electric generating facility and related electric interconnection switchyard on a total of approximately 73 acres of land off Lake Road in Killingly, Connecticut. A 63-acre parcel north and west of Lake Road would support the power generating facility, including a 150-foot tall exhaust stack. The electric switchyard would be constructed on a separate 10-acre parcel south and east of Lake Road, adjacent to an existing Eversource electric transmission line right of way. The primary source of fuel for the KEC facility will be natural gas. Natural gas service to the KEC facility will require an approximately 2.5 mile gas line lateral extension constructed within an existing gas line right of way. During times of natural gas curtailment or service interruption, the KEC facility would operate on Ultra Low Sulfur Distillate (“USLD”) as a backup fuel.

The location, layout and design of certain elements and features of the proposed KEC facility are subject to change under provisions of Conn. Gen. Stat. § 16-50g et seq.

On the day of the Siting Council public hearing on this proposal, NTE will fly a balloon at the height of 150 feet, representing the tallest structure (the stack) at the KEC facility. Interested parties and residents are invited to review the Application at any of the following offices:
