

# Call For Proposals

## Do You Have

- In-depth knowledge about a facet of green building?
- Insight into new trends or technologies?
- A unique sustainability story?
- Expertise on equitable environmental policy?

If your answer is yes, we would like to invite you to participate in this year's Built Green Conference!

## What We're Looking For

The conference will cover a variety of topics related to green building, ranging from building science to policy, from groundbreaking research to discussions on equity, affordability, and community issues. In short, we want to hear your ideas.

We are eager to receive proposals based on other innovative and interactive formats. Sessions may be lectures, panels, or workshops that are one hour long. Proposals will be judged on:

- Compelling and practical information based on experience
- Innovation and originality in approach, ideas, projects, or programs
- Demonstrated and established expertise in the proposed topic
- Speaking skills shown through previous speaking engagements
- Professional, well thought-out material

Please note that session proposals may be combined if the content aligns and would be conducive to such a format.

All speakers will receive a complementary conference registration.

## About The Conference

**DATE:** September 13, 2018

**LOCATION:** Lynnwood Convention Center, Lynnwood (just north of Seattle)

**OBJECTIVE:** To educate about innovations in green building and sustainability

**AUDIENCE:** Professionals in green building, policy makers, and the environmentally-minded public

**For more information, visit [builtgreenconference.net](http://builtgreenconference.net)**

## Submitting Your Proposal

Email a packet to Built Green Program Manager Leah Missik at [lmiskik@mbaks.com](mailto:lmiskik@mbaks.com) that includes:

- Draft session title
- Abstract of 300 words or less
- Speaker biography of 100 words or less
- Speaker headshot for use in conference materials, if chosen
