Erik Hilde is an Associate Engineering Geologist currently working out of the Geofirm office in Laguna Beach where he specializes in the characterization of the complex geotechnical conditions affecting custom home and public works projects throughout Orange County and beyond. He has extensive experience in the geologic evaluation of large and small coastal margin and blufftop projects affected by liquefaction, slope instability, or other potential seismic hazards. Mr. Hilde is also familiar with the various local and state regulatory constraints affecting projects overseen by agencies, such as the California Coastal Commission, with special restrictions
