Mr. Haggard is a Senior Engineering Geologist with 39 years experience throughout southern California in major development projects both commercial and residential. Mr. Haggard and staff provided the geotechnical services associated with the 9-year planning and rough grading for one of South Orange County's major hillside developments. He has also worked on and managed the geotechnical services provided for large-scale planning projects including design and construction of major roadways and infrastructure. Forensic geotechnical investigations associated with defects litigation in residential development are also on the list of the many varied types of projects a 39-year career in geotechnical consulting encompasses. Mr. Haggard has extensive experience in landslide investigations related to large acreage land development and mitigation of reactivated landslides in existing residential communities in Ventura, Los Angeles, Orange and San Diego Counties.
