

The Experience Effect Coaching

Effective Meetings

18 minutes. The average adult's attention span.

31 – 60 minutes. The length of the average meeting.

Slap a dollar amount on the lack of productivity that meetings are draining from your credit union and you'll wonder why you meet at all. That's where we come in. We teach your management team how to reduce both the length and number of meetings they have with employees. Our goal is to increase the effectiveness of meetings while reducing the money and time they cost the credit union.

10 minutes. The length of an effective meeting.

Your management team will learn to incorporate our research based approach to facilitating the most effective meetings for their team. As a result, productivity and accountability will increase. Let us help you turn your meetings into an investment!

If you need another reason to invest in our approach, figure out what your meetings are currently costing your credit union:

Take the hourly employee rate, multiply it by number of participants and then by the length of the meeting. That's a line item cost that would be unacceptable in any other area of the credit union!

Meetings are a symptom of bad organization. The fewer meetings the better.
~Peter Drucker
