

Creation Training

Living Waters Bible Camp strives to be a premier resource for creation training in the Midwest!

We desire to provide quality events and programs to help individuals understand their beliefs about creation and to express their knowledge to others in a loving and caring way.

Join us this spring as we welcome Dr. Larry Guthrie, Jay Seegert and the Petersons as they speak about the glories of God's creation.

Living Waters Bible Camp

A scenic year- round Christian camp nestled in a beautiful valley in southwestern Wisconsin, which displays the wonders of God's creation. At Living Waters Bible Camp, we are committed to salvation through Jesus Christ, God's Son, and making everyone complete in Christ from children to adults.

Special Guests

Dan and Sharon Peterson are experts on Bats. Their ministry, Incredible Bats tours to schools, churches and special events teaching people about bats. Dan and Sharon bring a thrilling interactive program that you will be talking about for years to come!

Our own **Joy Hadley** will also showcase a few of our special animals to demonstrate the design of flight.

Our Speakers

Dr. Larry Guthrie

Dr. Larry Guthrie has served the Lord in the classroom, camping ministry, radio ministry and much more. He is a dynamic speaker, taking examples from God's creation and everyday life to make teachable moments for believers young and old.

Larry will share first hand stories about eagles to teach us lessons of commitment to a lifelong mate, flying into the storms of life, fleeing from evil and gaining strength from God alone.

Jay Seegert

Jay is a longtime friend of camp and we are excited to have him back! He is the Keynote Speaker and Managing Director for The Starting Point Project (TheStartingPointProject.com) a creation ministry offering training through seminars and tours.

Jay has a passion for helping Christians strengthen their faith, while also offering a gracious challenge to the sincere skeptic.

During the creation conference Jay will be leading a session on DNA code and how it's complexity directs us to a designer.
