On the Back App Chair with the adjustable Magic Ball and your feet on the footplate you will:

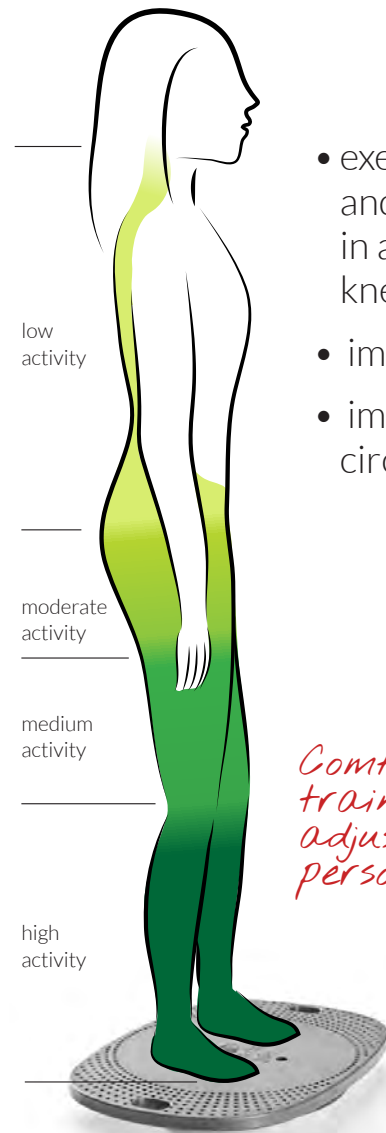

- sit more upright with less effort
- burn more energy **+19%**
- exercise your core muscles in lower back and neck

NO MORE BACK PAIN!

Standing on Back App 360

On the 360 Balance Board with the adjustable Magic Ball you will:

- exercise joints and muscles in ankles, legs, knees and hips
- improve posture
- improve blood circulation

Comfortable training you can adjust to your personal level.

Back App Chair

On the Back App you sit tilting in all directions with your feet on a footplate padded with a soft damping material.

By turning the ball up or down you easily adjust the tilting movement.

The sitting position and the gentle motion ensure a wonderful sitting experience both with and without wheels.

Back App 360

Balancing on Back App 360 you are tilting in all directions.

By turning the red knob in either direction you easily adjust the tilting movement.

The soft ring shaped damping device makes the tilting experience comfortable for all users.

The Back App chair and the Back App 360 balance board utilize the patented Back App technology. A comfortable 360 degree tilting movement is achieved by the body balancing on the centrally positioned "Magic Ball" surrounded by a soft ring-shaped damping cushion.

Product info

Back App

- The Back App base frame is made from 99.9% recycled die-cast aluminum and is available in Silver Grey finish.
- The ball in the base is moulded onto a tube and can be screwed into and out of the aluminum frame to control the tilt of the chair. A tilt indicator with green and red color is integrated in this tube.
- Back App comes with one lift height suitable for the majority of people.
- The seat comes with the following fabrics:
 - Nordic Wool - Black felt wool
 - Skai Palma - Black steam permeable synthetic leather
 - Alcantara - Composite Material in four standard colors

Back App Wheels

Is made from 99.9% recycled ingot-molded aluminum and comes in Silver Grey

Back App 360 Balance Board

Comes in Dark and Light grey and is made of recyclable thermo plastics. Turning the red knob adjusts the tilt levels.

The function of Back App and the effects on the body are well documented in scientific studies.
