Participant guidelines

There are no formal height restrictions but for safety reasons there is a weight limit of 18st (114kg) and in order to reach the floor whilst seated on the ‘jockey seat’ participants should have an inside leg measurement of 24 inches. This is however a guideline only as allowances will be made assuming you are fit and healthy. You must be physically fit able to sit on the seats correctly to take the impact through your legs as this is a high impact, demanding experience. There are no qualifications required. This is not suitable for pregnant women or people with histories of bad backs or necks. You will be asked on the day if you know of any medical reason why you should not participate. Please do not put yourself at risk. There is a lower age limit of 8. An adult must accompany each under 18. If under 16 this must be one adult per child.
